5. Prohibition on landing
6. Conditions for landing
7. Certificates to accompany consignments imported from Member States.
8. Certificates to accompany consignments imported from third countries
9. Certificates to accompany consignments exported from Northern Ireland
10. General provisions concerning certificates
11. Examination, sampling and marking
12. Consignments landed in contravention of Order
13. Pests or genetically manipulated material landed in contravention of Order.
14. Persons authorised by an inspector.
15. Officers of Customs and Excise
16. Licences
17. Information which may be required
18. Offences

ARRANGEMENT OF SCHEDULES

Schedule
1. Pests which may not be landed
2. Conditions subject to which landing is permitted—

PART I

ROOTED PLANTS AND UNROOTED VEGETATIVE PROPAGATING MATERIAL OTHER THAN BULBS, CORMS, TUBERS OF POTATO AND SEEDS

A. General conditions: items 1-11.

B. Additional conditions in particular cases: items 12-47.

PART II

BULBS AND CORMS FOR PLANTING

A. General conditions: items 48-50.
B. Additional conditions in the case of corms of Gladiolus and bulbs of the genera *Tulipa* and *Narcissus*: items 51-52.
C. Additional conditions in the case of bulbs of the genus *Allium*, corms of Freesia and Crocus and bulbs of Iris: items 53-55.

PART III

SEEDS

A. General conditions: item 56.
B. Additional conditions in the case of seeds of lettuce, lucerne, pea and tomato and of the genus *Rubus*: items 57-62.
C. Additional conditions in the case of seeds of the families Cruciferae and Gramineae and of the genus *Trifolium*: item 63.
D. Additional conditions in the case of seeds of Onion, Leek and Chive: item 64.

PART IV

RAW FRUIT

A. General conditions: item 65.
B. Additional conditions in the case of raw fruit of the genera *Citrus, Cydonia, Malus, Prunus* and *Pyrus*: items 66-70.
C. Additional conditions in the case of raw fruit of the genera *Fragaria, Ribes, Rubus, Vaccinium* and *Vitis*: items 71-75.

PART V

RAW VEGETABLES

A. General conditions: item 76.
B. Additional conditions in particular cases: items 77-78.

PART VI

CUT FLOWERS AND PARTS OF PLANTS USED FOR DECORATION

A. General conditions: item 79.
B. Additional conditions in the case of cut flowers and parts of plants used for decoration of the genera *Castanea, Dendranthema, Dianthus, Gladiolus, Prunus, Quercus, Rosa, Salix, Syringa* and *Vitis*: items 80-82.
C. Additional conditions in the case of cut flowers of the genus *Protea*: item 83.

Schedule

3. Plants and plant products to be accompanied by a phytosanitary certificate or a re-forwarding phytosanitary certificate when exported.
4. Form of phytosanitary certificate.
5. Form of re-forwarding phytosanitary certificate.

The Department(a) of Agriculture, in exercise of the powers conferred on it by sections 2(1)(b), (2) and (3)(c), 3(1)(b), (2)(b), (3) and (4)(d) and 3A(e) of the Plant Health Act (Northern Ireland) 1967(f) and ofevery other power enabling it in that behalf, hereby makes the following Order:

Citation and commencement

1. This Order may be cited as the Import and Export (Plants and Plant Products) (Plant Health) Order (Northern Ireland) 1981 and shall come into operation on 1st April 1981.

Revocation

2. The Importation of Plants, Plant Produce and Trees Order (Northern Ireland) 1972(g) in so far as it applies to plants and plant products is hereby revoked.

Interpretation

3.—(1) In this Order—

"authorised officer" in relation to—

(*a*) the completion and signing of phytosanitary certificates and re-forwarding phytosanitary certificates;

(*b*) the completion and signing of translations of phytosanitary certificates and re-forwarding phytosanitary certificates;

(*c*) the certifying of copies,

means a representative of the plant protection service of the country in which such certificates, translations or copies are issued;

"Central America" means the geographical area comprising Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panama and the islands commonly known as the West Indies;

"consignment" includes the whole or any part of a consignment of plants or plant products or both plants and plant products and soil, together with packing materials, packages or containers enclosing or accompanying such plants or plant products;

"country" includes a part or a region of the United Kingdom, a Member State or a third country;

"Customs Act" means the Customs and Excise Management Act 1979(h);

"Euro-Mediterranean area" means the geographical area comprising Europe and Algeria, Cyprus, Egypt, Israel, Jordan, Lebanon, Libya, Malta, Morocco, Syria, Tunisia and Turkey;

"Europe" includes the Canary Islands but does not include the Azores, Cyprus or Malta or the following regions of the Union of Soviet Socialist Republics, that is the Kazakh, Kirghiz, Tadzhik, Turkmen and Uzbek Soviet Socialist Republics and the following regions of the Russian Soviet Federal Socialist Republic, that is the Buryat, Yakut and Tuva Autonomous Soviet Socialist Republics, the Altai, Khabarovsk, Krasnoyarsk and Maritime Krais and the

(a) Formerly Ministry: *see* 1973 c. 36 s. 40 and Sch. 5 para. 8(1)
(b) As amended by S.R. & O. (N.I.) 1972 No. 351 Art. 3 and Sch. 2
(c) Inserted by S.I. 1975/1038 (N.I. 8) Art. 11(1)
(d) As amended by 1967 c. 29 (N.I.) s. 1(2) and Sch. Part II
(e) Inserted by S.I. 1975/1038 (N.I. 8) Art. 11(2)
(f) 1967 c. 28 (N.I.)
(g) S.R. & O. (N.I.) 1972 No. 67
(h) 1979 c. 2.

Amur, Chita, Irkutsk, Kamchatka, Kemerovo, Kurgan, Magadan, Novosibirsk, Omsk, Sakhalin, Tomsk and Tyumen Oblasts;

"European Community" includes the Isle of Man and the Channel Islands;

"genetically manipulated material" means material derived from any activity which has involved genetic manipulation and which, in the opinion of the Department, is likely to result in the production of a pest;

"genetic manipulation" means the formation of new combinations of heritable material by the insertion of nucleic acid molecules, produced by whatever means outside the cell, into any virus, bacterial plasmid or other vector system so as to allow their incorporation into a host organism in which they do not naturally occur but in which they are capable of continued propagation;

"immediate vicinity" means any land contiguous to or surrounding a place of production which, if such land were affected by the pests listed in Schedule 1, might, in the opinion of the plant protection service, present a risk of contamination to the plants at the place of production;

"importer" in relation to any plant, plant product, pest, genetically manipulated material or soil includes any person who, as owner, consignor, consignee, agent, broker or otherwise, is in possession of or is in any way entitled to the custody or control of the plant, plant product, pest, genetically manipulated material or soil;

"inspector" means an officer of the Department authorised in writing by the Department for the purposes of this Order;

"landed" means brought into Northern Ireland by any means whatsoever;

"Member State" means a Member State, other than the United Kingdom, of the European Community and does not include the Isle of Man or any of the Channel Islands;

"non-indigenous" means not known, in the opinion of the Department, to be established in Northern Ireland;

"North America" means the geographical area comprising Canada, Mexico and the United States of America (other than the State of Hawaii);

"official" in relation to any testing or any other procedure required by this Order to be carried out in respect of any plant, plant product or soil, means carried out by or under the supervision of the plant protection service of the country in which the plant or plant product was grown or the soil originates;

"official statement" means a statement by an authorised officer made on a phytosanitary certificate or a re-forwarding phytosanitary certificate;

"package or container" means—

(*a*) a bag or sack either of which has been previously unused; or

(*b*) a box or crate either of which has been previously unused or either of which has been cleaned and disinfected since its previous use;

"pest" means a living organism other than a vertebrate animal, or a pathogen, which is injurious to any plant and includes a culture of such organism or pathogen;

"phytosanitary certificate" means a certificate in the form set out in Schedule 4 or an equivalent text in a language other than English;

"place of production" means a group of fields or plots of land normally worked as a unit together with any uncultivated land contiguous thereto;

"plant" means a living plant or living part of a plant, any tissue culture of such a plant or living part of such a plant, raw fruit or seed and includes any soil or other growing medium, packing material or container associated therewith;

"plant product" means a product of plant origin, which product is unprocessed or has undergone simple preparation in so far as it is not a plant, and includes any

soil or other growing medium, packing material and container associated therewith;

"potato" means any plant or any part of a plant, including tubers and true seed, of *Solanum tuberosum* L. or other tuber forming species of *Solanum* L.;

"premises" includes any building (other than a private dwelling house), land, vehicle, vessel, aircraft, hovercraft or freight container;

"raw fruit" does not include dried, dehydrated or deep-frozen fruit and "raw" in relation to fruit of any particular description shall be construed accordingly;

"raw vegetables" does not include potatoes and does not include any other kind of vegetable which has been dried, dehydrated, brined, pickled or deep-frozen;

"re-forwarding phytosanitary certificate" means a certificate in the form set out in Schedule 5 or an equivalent text in a language other than English;

"South America" means the geographical area comprising Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, French Guiana, Guyana, Paraguay, Peru, Surinam, Uruguay and Venezuela;

"third country" means a country other than a Member State, the United Kingdom, the Isle of Man or any of the Channel Islands;

"vehicle" means a structure in or on which persons or goods are transported by land;

"vessel" means a craft or structure in or on which persons or goods are transported by water.

(2) Nothing in this Order shall permit the landing of—

(*a*) a consignment of potatoes, the landing of which is prohibited or restricted under the Import and Export (Potatoes) (Plant Health) Order (Northern Ireland) 1981(**a**); or

(*b*) wood, isolated bark or other objects the landing of which is prohibited or restricted under the Import and Export (Wood and Bark) (Plant Health) Order (Northern Ireland) 1981(**b**).

Exceptions

4.—(1) The provisions of this Order, other than Articles 9, 10, 17 and 18, shall not apply in relation to any plant or plant product either of which is grown in Northern Ireland except that in relation to any such plant or plant product either of which is exported from and subsequently re-imported into Northern Ireland all the provisions of this Order shall apply.

(2) The requirements of Articles 6, 7, 8 and 10 in relation to phytosanitary certificates and re-forwarding phytosanitary certificates shall not apply to plants or plant products (other than plants of the genera *Malus* Mill., *Prunus* L., and *Pyrus* L., which are intended for planting or propagation or cut flowers of Gladiolus which are grown in Malta and plants of Chrysanthemum) landed in the baggage of a passenger and which:

(*a*) have been grown in any part of the Euro-Mediterranean area; and

(*b*) in the case of bulbs, corms and tubers for planting, raw fruit and raw vegetables, do not together exceed 2 kilograms in weight or in the case of other plants or plant products do not in total exceed 5 in number.

(3) The provisions of Articles 6, 7 and 10 in relation to phytosanitary certificates and re-forwarding phytosanitary certificates shall not apply to—

(**a**) S.R. 1981 No. 36
(**b**) S.R. 1981 No. 37

(*a*) raw fruit;

(*b*) raw vegetables;

(*c*) cut flowers and other parts of plants used for decoration,

which are described in Parts IV, V and VI of Schedule 2 and which have been consigned to Northern Ireland from the Republic of Ireland and which have—

(*a*) been grown in the Republic of Ireland, or

(*b*) been landed in the Republic of Ireland in accordance with the importation regulations governing such landing.

Prohibition on landing

5. Except as provided in Part IVA of Schedule 2 in respect of raw fruit and in Part VIA of Schedule 2 in respect of cut flowers a person shall not land—

(*a*) a pest which is listed in Schedule 1;

(*b*) a non-indigenous pest whether or not it is listed in Schedule 1;

(*c*) a pest which has been subjected to genetic manipulation or any genetically manipulated material; or

(*d*) soil, other than peat, not being soil landed in association with the growing plants or plant products which:

(i) has been consigned to Northern Ireland from a third country;

(ii) originates outside Europe and has been consigned to Northern Ireland from a Member State and which has not been officially tested and found to be free from pests.

Conditions for landing

6. A person shall not land a plant or a plant product either of which is described in Schedule 2 unless such plant or plant product fulfils the conditions set out in Schedule 2 opposite the description of such plant or plant product.

Certificates to accompany consignments imported from Member States

7.—(1) A person shall not land a consignment of a description set out in Parts IA, IIB, IIIB, or VB of Schedule 2 which has been consigned to Northern Ireland from a Member State, or soil which has been so consigned unless such consignment or soil is accompanied by:

(*a*) a phytosanitary certificate issued in the country in which such plant or plant product was grown or such soil originates; and

(*b*) a re-forwarding phytosanitary certificate issued in each other country from which such consignment or soil has been consigned prior to its landing.

(2) Subject to the provisions of paragraph (3), a person shall not land a consignment which is of a description set out in Part IIA (other than corms of Gladiolus and bulbs of Tulip and Narcissus), Part IVB or Part VIB of Schedule 2 and which has been consigned to Northern Ireland from a Member State unless such consignment is accompanied by a phytosanitary certificate issued in that Member State.

(3) Where a consignment as described in paragraph (2) has been consigned from any other country to a Member State before it has been consigned from that Member State to Northern Ireland instead of a phytosanitary certificate issued in that Member State such consignment may be accompanied by:

(*a*) the latest phytosanitary certificate relating to such consignment issued in one of the countries from which it was previously consigned, together with

(*b*) a re-forwarding phytosanitary certificate relating to such consignment issued in each other country from which it has been consigned subsequent to its

consignment from the country in which the latest phytosanitary certificate relating to such consignment was issued.

(4) The requirements relating to re-forwarding phytosanitary certificates set out in paragraphs (1), (2) and (3) shall only apply to the re-export of a consignment to Northern Ireland from another country if:

(*a*) such consignment has, before being consigned to Northern Ireland, been stored, repacked or split up in the country from which it has been re-exported to Northern Ireland; or

(*b*) in the case of a consignment of plants of chrysanthemum, carnation, pelargonium and tomato for planting and raw vegetables of the genera *Beta* L., *Brassica* L., *Cichorium* L., *Daucus* L. and *Lactuca* L., the address of the consignee which is set out in the phytosanitary certificate accompanying the consignment is not in Northern Ireland.

Certificates to accompany consignments imported from third countries

8.—(1) A person shall not land a consignment of a description which is set out in Parts IA, IIA, IIIB, IIIC, IVB, IVC, VB, VIB or VIC of Schedule 2 and which has been consigned to Northern Ireland from a third country unless such consignment is accompanied by:

(*a*) a phytosanitary certificate issued in the country in which such consignment was grown; and

(*b*) a re-forwarding phytosanitary certificate issued in each other country from which such consignment has been consigned prior to its landing.

(2) Paragraph (1)(*b*) shall only apply to the re-export of a consignment to Northern Ireland from a particular country if:

(*a*) such consignment has before being consigned to Northern Ireland been stored, repacked or split up in the country from which it has been re-exported to Northern Ireland; or

(*b*) the address of the consignee set out in the phytosanitary certificate accompanying the consignment is not in Northern Ireland.

Certificates to accompany consignments exported from Northern Ireland

9.—(1) Subject to the provisions of paragraphs (3) and (4), a person shall not export from Northern Ireland a consignment of a description which is set out in Schedule 3 unless such consignment is accompanied by a phytosanitary certificate or a re-forwarding phytosanitary certificate and such certificate has been issued by the Department or an inspector immediately before the exportation of such consignment.

(2) An application for a phytosanitary certificate or a re-forwarding phytosanitary certificate shall be made to the Department or an inspector with such information, in such form and in such manner as the Department may require.

(3) Paragraphs (1) and (2) shall not apply to a consignment which has been consigned from Northern Ireland to Great Britain, the Isle of Man or any of the Channel Islands, the contents of which have either been grown in Northern Ireland or have been landed in accordance with the provisions of this Order.

(4) Paragraphs (1) and (2) shall not apply to a consignment which consists of raw fruit, raw vegetables, cut flowers or other parts of plants used for decoration, which have been consigned from Northern Ireland to the Republic of Ireland and which have either been grown in Northern Ireland or been landed in accordance with the provisions of this Order.

General provisions concerning certificates

10.—(1) An inspection (other than an inspection for the purpose of making an official statement in respect of the requirements of Schedule 2) referred to in a

phytosanitary certificate or a re-forwarding phytosanitary certificate shall be carried out not more than 14 days, and in the case of a phytosanitary certificate accompanying a consignment of Chrysanthemums (not being cut flowers) not more than 48 hours, before the date of export of the consignment which such certificate is to accompany.

(2) A phytosanitary certificate or a re-forwarding phytosanitary certificate shall not be valid for the purposes of this Order unless it has been completed and signed by an authorised officer not more than 14 days, and in the case of a phytosanitary certificate accompanying a consignment of Chrysanthemums (other than cut flowers), not more than 48 hours, before the date of export of the consignment which such certificate is to accompany and after the carrying out of any inspection referred to in paragraph (1) in respect of that consignment.

(3) An official statement in respect of the requirements of Schedule 2 shall be deemed to have been given by the issue, in accordance with the provisions of this Order, of a phytosanitary certificate to accompany a consignment.

(4) Where a phytosanitary certificate or a re-forwarding phytosanitary certificate is issued in a third country, the language of which country is other than English, such certificate shall incorporate or be accompanied by a translation in English of the text thereof which translation, if it is a document separate from such certificate, shall be completed and signed by an authorised officer.

(5) Subject to paragraph (6), where a consignment has been consigned between two or more than two countries before it is consigned to Northern Ireland such consignment may, in place of a certificate required by this Order, be accompanied by a copy of a certificate required by this Order issued in the country from which such consignment has been consigned to Northern Ireland if such copy certificate is certified by an authorised officer either as a true copy of the original or as a true copy of a certified copy of the original as the case may be.

(6) In the case of a re-forwarding phytosanitary certificate issued in the country from which the consignment was consigned direct to Northern Ireland paragraph (5) shall not apply and the original re-forwarding phytosanitary certificate shall accompany such consignment.

(7) A phytosanitary certificate and any re-forwarding phytosanitary certificate shall be submitted by the importer to the proper officer at the same time as and together with the entry which relates to the consignment in respect of which such certificate has been issued. In this paragraph the expression "proper officer" has the meaning attached thereto in the Customs Act and the reference to the entry shall be construed as a reference to the entry, delivery of which is to be made in accordance with the provisions of that Act.

(8) A phytosanitary certificate or a re-forwarding phytosanitary certificate shall not be valid unless the authority (whether central, regional, municipal or local) of a country or a department, service or other organ of such authority, which issues such certificate is the only one in relation to that country which is empowered to issue such a certificate.

Examination, sampling and marking

11. An inspector, upon production if so required of his authority, may for the purposes of this Order—

(*a*) (i) enter and examine premises and mark any part thereof;

(ii) examine, take samples of and mark a consignment landed or reasonably believed by him to have been landed, whether or not such consignment was, or ought to have been, accompanied by a certificate or licence required by this Order; and

(iii) examine and take samples of a pest or genetically manipulated material either of which has been landed or is reasonably believed by him to have been landed;

(*b*) for the purposes of the examination set out in paragraph (*a*), open or authorise any person to open on his behalf or require the importer or any person in charge of a consignment to open, in such manner as the inspector may require, any container, bundle or package containing the consignment;

(*c*) if and so far as is necessary for the purposes of such examination, prohibit, either entirely or to the extent indicated by him by notice in writing, the movement of—

(i) a consignment or a pest or genetically manipulated material which has been landed or is reasonably believed by him to have been landed; and

(ii) any material or object by means of which in his opinion a pest is likely to be spread; and

(iii) the freight container, container, bundle or package in which such consignment has been consigned;

(*d*) enter premises and examine, take samples of and mark any consignment or genetically manipulated material which has been landed or is reasonably believed by him to have been landed during the previous 12 months or any plants derived or reasonably believed by him to have been derived from a consignment so landed.

Consignments landed in contravention of Order

12.—(1) If it appears to an inspector that any plant, plant product or soil in a consignment is in course of being or is about to be or is likely to be landed and that—

(*a*) if landed such plant, plant product or soil would be landed in contravention of the provisions of this Order; or

(*b*) such plant, plant product or soil is not substantially free from a pest, freedom from which is not a condition set out in Schedule 2 in relation to that consignment; or

(*c*) such plant, plant product or soil is carrying or infected with a non-indigenous pest,

he may serve upon the importer or any person in control of the landing or unloading of that consignment from a vessel, aircraft, vehicle, hovercraft or freight container a notice:

(i) prohibiting the landing or unloading of that consignment; or

(ii) setting out the manner in which the landing or unloading of that consignment is to be carried out and the precautions which are to be taken in the course thereof and the further precautions which are to be taken following upon such landing or unloading; or

(iii) requiring that, if landed or unloaded, the consignment or such part thereof as may be set out in such notice be destroyed within such time and in such manner as may be set out in such notice.

(2) If it appears to an inspector at any time that a plant, plant product or soil in a consignment has been landed and that—

(*a*) such landing is in contravention of the provisions of this Order: or

(*b*) such plant, plant product or soil is not substantially free from a pest, freedom from which is not a condition set out in Schedule 2 in relation to that consignment; or

(*c*) such plant, plant product or soil is carrying or infected with a non-indigenous pest,

he may serve upon the importer a notice:

(i) requiring him within such time and in such manner as may be set out in the notice to destroy the consignment or such part thereof as may be set out in the notice and to take such other steps as may be set out in the notice to prevent the spread of any pest which appears to the inspector to have been landed with that consignment; or

(ii) requiring that the consignment or such part thereof as may be set out in the notice shall not be removed from the premises set out in the notice.

(3) A notice served under paragraph (2) on the grounds set out in sub-paragraphs (*b*) and (*c*) thereof requiring the destruction of a consignment of plants, plant products or any soil may postpone such destruction for such period and subject to such conditions if any, as may be set out in that notice.

(4) Where the destruction required by a notice served under paragraph (2) has been postponed in accordance with paragraph (3) the importer upon whom the notice was served shall within the period set out in such notice destroy the pest carried by or infecting such consignment. If however the importer upon whom the notice was served fails within the period set out in the notice to destroy that pest to the satisfaction of an inspector then the destruction required by the notice shall be carried out by the importer within 2 days following the expiry of the period set out in the notice or within such other period as may be set out in writing by an inspector.

(5) Destruction required by a notice served under paragraph (1) or (2) shall be carried out to the satisfaction of an inspector by the importer upon whom the notice is served at a place designated by an inspector and, except with the authority in writing of the Department or an inspector, none of the plants, plant products or pests shall be moved otherwise than direct to such place.

(6) A notice served under paragraph (1) or (2) may be amended or withdrawn by the Department or an inspector by a further notice in writing served upon the person upon whom the first notice was served.

(7) If an importer shall fail to comply with the requirements of a notice served under paragraph (1), (2) or (6), then, without prejudice to any proceedings under this Order consequent upon such failure, an inspector or a person authorised by him for the purpose may, on production if so required of his authority, enter for the purposes of this Order any premises in which the consignment to which the notice relates may be and take such steps as appear to the inspector to be necessary either to ensure that the requirements or conditions of the notice have been complied with or to remedy the consequences of the failure so to comply and the cost of the taking of such steps shall be recoverable as a civil debt by the Department from the person upon whom the notice was served.

(8) The provisions of this Article are without prejudice to the provisions of the Customs Act.

Pests or genetically manipulated material landed in contravention of Order

13.—(1) If it appears to an inspector that a pest or genetically manipulated material is in course of being or is about to be or is likely to be or has been landed in contravention of the provisions of this Order, he may serve upon the importer a notice requiring him to destroy that pest or genetically manipulated material within such time and in such manner as may be set out in such notice and to take such steps to prevent the spread of such pest as may also be set out in such notice.

(2) A notice served under paragraph (1) may be amended or withdrawn by the Department or an inspector by a further notice in writing served upon the person upon whom the first notice was served.

(3) If an importer shall fail to comply with the requirements of a notice served under paragraph (1) or (2) then, without prejudice to any proceedings under this Order consequent upon such failure, an inspector or a person authorised by him for the purpose may, on production if so required of his authority, for the purposes of this Order enter any premises in which the pest or genetically manipulated material to which the notice relates may be and take such steps as appear to the inspector to be necessary either to ensure that the requirements or conditions of the notice have been complied with or to remedy the consequences of the failure so to comply and the cost of the taking of such steps shall be recoverable as a civil debt by the Department from the person upon whom the notice was served.

(4) The provisions of this Article are without prejudice to the provisions of the Customs Act.

Persons authorised by an inspector

14. An inspector who authorises a person to take action as set out in Article 12(7) or Article 13(3) shall give instructions in writing to that person in sufficient detail as to the steps which appear to the inspector to be necessary for that person to take.

Officers of Customs and Excise

15.—(1) An inspector may, either orally or in writing, request an officer of Customs and Excise to prohibit the removal from the place of landing of a consignment which has not been cleared from Customs charge until it has been examined by an inspector. A request under this paragraph which has been made orally shall be confirmed in writing.

(2) Where a request has been made under paragraph (1) the officer of Customs and Excise shall by notice in writing served upon the importer require that until such consignment has been examined by an inspector it shall not be removed from the place set out in the notice, and he shall at the same time send a copy of such notice to the inspector making the request referred to in paragraph (1).

(3) As soon as practicable after receipt of the copy of such notice an inspector shall examine such consignment and shall in writing inform the officer of Customs and Excise of the terms of any notice served under this Order and of any action taken by the inspector in accordance with the provisions of this Order.

(4) Where a notice under paragraph (2) has been served a person shall not, except with the written consent of either such officer of Customs and Excise or an inspector, move contrary to the terms of the notice such consignment prior to its inspection by an inspector.

Licences

16. Notwithstanding any provision in this Order a consignment or a pest or genetically manipulated material or soil may be landed in accordance with the conditions of a licence granted by the Department.

Information which may be required

17.—(1) A person who has, or has had, in his possession or under his charge any plant, plant product, genetically manipulated material, pest or soil which the Department or an inspector knows to have been, or has reasonable cause to believe has been, landed or exported from Northern Ireland and a person who, as auctioneer, salesman or otherwise, has sold or offered for sale any such plant, plant product, pest, genetically manipulated material or soil shall if so required by notice in writing from the Department or an inspector furnish to the Department or an inspector within the time set out in that notice such information as he may possess as to any person who has or has had, or is likely to have or to have had, any such plant, plant product, pest,

genetically manipulated material or soil in his possession, custody or control or under his charge.

(2) Information furnished under paragraph (1) shall not be available as evidence against the person furnishing the same in any prosecution under this Order except in respect of an alleged failure to comply with paragraph (1).

Offences

18.—(1) A person shall be guilty of an offence if he:

(*a*) contravenes or fails to comply with a provision of this Order or a term or condition of a notice served or licence granted in accordance with the provisions of this Order;

(*b*) (i) knowingly or recklessly makes a false statement for the purpose of obtaining a phytosanitary certificate or a re-forwarding phytosanitary certificate; or

(ii) wilfully obstructs or impedes in the exercise of his powers under this Order an inspector or a person authorised by an inspector.

(2) An offence against this Order shall be punishable on summary conviction by a fine of not more than £100 for a first offence or £200 for a second or subsequent offence.

(3) Paragraphs (1) and (2) shall not apply to the landing of an article of any description the landing of which is prohibited by this Order and in respect of which a penalty may be imposed under the Customs Act.

Sealed with the Official Seal of the Department of Agriculture for Northern Ireland on 10th February 1981

(L.S.)

D. J. Alexander
Assistant Secretary

SCHEDULE 1 Article 5

PESTS WHICH MAY NOT BE LANDED

PART I

Live organisms of the animal kingdom at all stages of their development

1. *Arrhenodes minutus* (Drury) — Oak Timber Worm.
2. *Cacoecimorpha pronubana* (Hübner) — Carnation Tortrix (moth).
3. *Cephalcia alpina* (Klug) — Larch Sawfly.
4. *Ceratitis capitata* (Wiedemann) — Mediterranean Fruit Fly.
5. *Comstockaspis perniciosa* (Comstock) (syn. *Quadraspidiotus perniciosus* (Comstock)) — San José Scale.
6. *Conotrachelus nenuphar* (Herbst.) — Plum Curculio (weevil).
7. *Cydia molesta* (Busck.) (syn. *Laspeyresia molesta* (Busck.)) — Oriental Fruit Moth.
8. *Epichoristodes acerbella* (Walker) — African Carnation Tortrix (moth).
9. *Gilpinia hercyniae* (Hartig) — European Spruce Sawfly.
10. *Globodera rostochiensis* (Wollenweber) Behrens and *Globodera pallida* (Stone) Behrens — Potato Cyst Nematodes.
11. *Hylurgopinus rufipes* (Eichoff) — Native Elm Bark Beetle.
12. *Hyphantria cunea* (Drury) — Fall Webworm.
13. *Leptinotarsa decemlineata* (Say) — Colorado Beetle.
14. *Liriomyza huidobrensis* (Blanchard) *L. sativae* Blanchard, *L. trifolii* (Burgess) and *Amauromyza maculosa* Malloch — American Leafminers.
15. *Popillia japonica* Newman — Japanese Beetle.
16. *Pristiphora abietina* (Christ) — Small Spruce Sawfly.
17. *Pseudopityophthorus minutissimus* (Zimmerman) and P. *pruinosus* (Eichoff) — Oak Bark Beetles.
18. *Rhagoletis cingulata* (Loew) — North American Cherry Fruit Fly.
19. *Rhagoletis fausta* (Osten Sacken) — Black Cherry Fruit Fly.
20. *Rhagoletis pomonella* (Walsh) — Apple Fruit Fly.
21. *Scaphoideus luteolus* Van Duzee — White Banded Elm Leaf Hopper.
22. *Scolytus multistriatus* (Marsham) — Small Elm Bark Beetle.
23. *Scolytus scolytus* (Fabricius) — Large Elm Bark Beetle.
24. *Spodoptera littoralis* (Boisduval) — Mediterranean Climbing Cutworm.
25. *Spodoptera litura* (Fabricius) — Asian and Pacific Cutworm.

PART II

Bacteria

1. *Corynebacterium michiganense* pv. *sepedonicum* (Spieck. and Kotth.) Dye and Kemp, the cause of Potato Ring Rot.
2. *Erwinia amylovora* (Burr.) Winsl. *et al.*, the cause of Fire Blight of Rosaceae.
3. *Xanthomonas populi* Ridé and Ridé, the cause of Bacterial canker of Poplar.

PART III

Cryptogams

1. *Angiosorus solani* Thirum and O'Brien, the cause of Potato Smut.
2. *Ceratocystis fagacearum* (Bretz) Hunt, the cause of Oak Wilt.
3. *Ceratocystis ulmi* (Buism.) C. Moreau, the cause of Dutch Elm Disease.
4. *Chrysomyxa arctostaphyli* Diet., the cause of Spruce Witches' Broom Rust.
5. *Cronartium comptoniae* Arthur, the cause of Sweet Fern Blister Rust of Pine.
6. *Cronartium fusiforme* Hedgc. and Hunt ex Cumm., the cause of Fusiform Rust of Pine.
7. *Cronartium quercuum* (Berk.) Miyabe ex Shirai, the cause of Pine-Oak Gall Rust.
8. *Endocronartium harknessi* (J. P. Moore) Y. Hiratsuka (syn. *Peridermium harknessi* J. P. Moore), the cause of Western Gall Rust of Pine.

9. *Endothia parasitica* (Murrill) P. J. and H. W. Anderson, the cause of Chestnut Blight.
10. *Guignardia laricina* (Saw.) Yamamoto and Ito, the cause of Shoot Blight of Larch.
11. *Hypoxylon pruinatum* (Klotzsche) Cke., the cause of Hypoxylon Canker of Poplar.
12. *Melampsora farlowii* (Arthur) Davis, the cause of Tsuga Needle Rust.
13. *Melampsora medusae* Thuem, (syn. M. *albertensis* Arthur), the cause of Conifer-Aspen Rust.
14. *Mycosphaerella populorum* Thomp. (syn. *Septoria musiva* Peck), the cause of Septoria Canker of Poplar..
15. *Ophiostoma roboris* Georgescu and Teodoru, associated with Oak Vascular Mycosis.
16. *Phytophthora cinnamomi* Rands, the cause of Root Rots and Wilts.
17. *Poria weirii* Murr., the cause of Poria Root Rot.
18. *Synchytrium endobioticum* (Schilb.) Perc., the cause of Potato Wart Disease.
19. *Scleroderris lagerbergii* Gremmen, the cause of Pine Top Canker.
20. *Urocystis cepulae* Frost, the cause of Onion and Leek Smut.

PART IV

Viruses and virus-like pathogens

1. Harmful viruses and virus-like pathogens of the genera *Cydonia* Mill., *Fragaria* L., *Malus* Mill., *Prunus* L., *Pyrus* L., *Ribes* L. and *Rubus* L.:—
   (*a*) Apple Proliferation Disease mycoplasm
   (*b*) Apricot Chlorotic Leaf Roll Disease mycoplasm
   (*c*) Cherry Rasp Leaf virus (American)
   (*d*) Peach Mosaic virus (American)
   (*e*) Peach Phony Rickettsia
   (*f*) Peach Rosette Disease mycoplasm
   (*g*) Peach Yellows Disease mycoplasm
   (*h*) Pear Decline Disease mycoplasm
   (*i*) Plum Line Pattern virus (American)
   (*j*) Plum Pox (Sharka) virus
   (*k*) Raspberry Leaf Curl viruses (American)
   (*l*) Strawberry Latent "C" virus
   (*m*) Strawberry Vein Banding virus
   (*n*) Strawberry Witches' Broom Disease mycoplasm
   (*o*) X Disease mycoplasm
   (*p*) Other harmful viruses and virus-like pathogens of the genera *Cydonia* Mill., *Fragaria* L., *Malus* Mill., *Prunus* L., *Pyrus* L., *Ribes* L. and *Rubus* L. which are not known to occur within the Member States.
2. Harmful viruses and virus-like pathogens of potato:—
   (*a*) Potato Spindle Tuber viroid
   (*b*) Potato Yellow Dwarf virus
   (*c*) Potato Yellow Vein virus
   (*d*) Other harmful viruses and virus-like pathogens of potato which are not known to occur within the Member States.
3. Elm Pholem Necrosis Disease mycoplasm.
4. Rose Wilt Disease pathogen.
5. Tomato Bunchy Top viroid (syn. Potato Spindle Tuber viroid)
6. Tomato Ring Spot virus.
7. Harmful viruses and virus-like pathogens of grapevine (*Vitis* L.).

PART V

Phanerogams

Arceuthobium M. Bieb. — Non-European species of dwarf mistletoe.

SCHEDULE 2 Article 6

CONDITIONS SUBJECT TO WHICH LANDING IS PERMITTED

PART IA

ROOTED PLANTS AND UNROOTED VEGETATIVE PROPAGATING MATERIAL OTHER THAN BULBS, CORMS, TUBERS OF POTATO AND SEEDS

General Conditions

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
1.	All rooted plants, planted or intended for planting, and all unrooted vegetative propagating material, including cuttings, scions and budwood but excluding aquarium plants consigned to Northern Ireland from a Member State.	(1) The consignment shall be accompanied by a phytosanitary certificate and, as appropriate, one or more re-forwarding phytosanitary certificates in accordance with the provisions of Article 7 or 8 and Article 10. (2) The consignment shall be free from pests listed in Schedule 1. (3) Where it has been consigned to Northern Ireland from a third country in addition to complying with the requirements of paragraphs (1), (2) and (5) or (6) the consignment shall be free from Stem Borers (*Opogona sacchari* (Bojer) and other *Opogona* spp.). (4) Where the consignment has been consigned to Northern Ireland from a Member State and the plants comprising it were grown outside Europe and are not free from soil, in addition to complying with the requirements of paragraphs (1) and (2), it shall be accompanied by an official statement that the soil attached to the plants has been found free from pests. (5) Where the consignment has been consigned to Northern Ireland from a third country and the plants comprising it were grown in the Euro-Mediterranean area and are not free from soil, in addition to complying with the requirements of paragraphs (1), (2) and (3), it shall be accompanied by an official statement that the soil attached to the plants has been found to be free from pests. (6) Where the consignment has been consigned to Northern Ireland from a third country and the plants comprising it were grown outside the Euro-Mediterranean area, in addition to complying with the requirements of paragraphs (1), (2) and (3), the plants comprising it shall have been freed.

SCHEDULE 2

PART IA

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		within 14 days prior to export, from the medium in which they were grown and, if packed, shall be packed in a medium which is free from pests and soil. (7) The consignment shall be accompanied by an official statement that the plants comprising it were grown at a place of production: (*a*) at which no symptoms of Root Rots and Wilts (*Phytophthora cinnamomi* Rands) have been observed; or (*b*) found free of Root Rots and Wilts (*Phytophthora cinnamomi* Rands).
2.	All rooted plants, whether planted or intended for planting, which are grown in the open air	The consignment shall be accompanied by an official statement that the plants comprising it were grown on land: (*a*) which is free from Potato Ring Rot (*Corynebacterium michiganense* pv. *sepedonicum* (Spieck. and Kotth.) Dye and Kemp) and Potato Wart Disease (*Synchytrium endobioticum* (Schilb.) Perc.); and (*b*) which has been officially sampled and the samples found to be free from Potato Cyst Nematodes (*Globodera pallida* (Stone) Behrens and *Globodera rostochiensis* (Wollenweber) Behrens).
3.	All annual and biennial plants	Where the consignment has been consigned to Northern Ireland from a third country, the plants comprising it shall have been grown in the Euro-Mediterranean area.
4.	All herbaceous perennials of the families: Caryophyllaceae; Compositae; Cruciferae; Leguminosae; and Rosaceae except plants of: carnation (*Dianthus caryophyllus* L.) chrysanthemum (species, hybrids and	Where the consignment has been consigned to Northern Ireland from a third country, the plants comprising it shall have been grown in the Euro-Mediterranean area.

SCHEDULE 2

PART IA

Item	Description of plants and plant products	Conditions subject to which landing is permitted
	cultivars of *Dendranthema* (DC.) Desmoul.) and strawberry (species, hybrids and cultivars of *Fragaria* L.).	
5.	All plants of trees and shrubs	Where the consignment has been consigned to Northern Ireland from a third country: (*a*) it shall be free from plant debris; and (*b*) the plants comprising it, other than (i) plants of a description set out in column 2 of item 16; and (ii) plants grown in Europe; shall have undergone effective treatment for the control of all stages of Homoptera and Lepidoptera and the method of treatment shall be declared in the phytosanitary certificate accompanying the plants.
6.	All plants of trees and shrubs except plants of the genera: *Abies* Mill. *Castanea* Mill. *Larix* Mill. *Picea* A. Dietr. *Pinus* L. *Populus* L. *Pseudotsuga* Carr. *Quercus* L. *Tsuga* Carr. *Ulmus* L. *Zelkova* Spach.	Where the consignment has been consigned to Northern Ireland from a third country, the plants comprising it shall not have been grown in South America or in any of the following countries or parts of countries— Afghanistan Angola Australia Bangladesh Bhutan Botswana Burundi Hong Kong Iran Japan Korea (North) Kenya Lesotho Macao Malawi Mozambique Nepal New Zealand Pakistan The People's Republic of China The Republic of India The Republic of South Africa Rwanda

SCHEDULE 2

PART IA

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		South Korea South West Africa Swaziland Taiwan Tanzania Uganda The Union of Soviet Socialist Republics — the Khabarovsk and Maritime Krais and the Kamchatka, Magadan and Sakhalin Oblasts of the Russian Soviet Federal Socialist Republic Zaire — Shaba province Zambia Zimbabwe
7.	All plants of trees and shrubs of the genera: *Abies* Mill. *Castanea* Mill. *Larix* Mill. *Picea* A. Dietr. *Pinus* L. *Populus* L. *Pseudotsuga* Carr. *Quercus* L. *Tsuga* Carr. *Ulmus* L. *Zelkova* Spach.	Where the consignment has been consigned to Northern Ireland from a third country, the plants comprising it shall have been grown in Europe.
8.	All plants of deciduous trees and shrubs.	Where the consignment has been consigned to Northern Ireland from a third country and the plants comprising it were grown outside Europe, the plants shall be in the dormant state and free from leaves.
9.	Plants of the family Solanaceae other than plants of potato.	(1) The consignment shall be: (*a*) free from Stolbur Disease mycoplasm; and (*b*) accompanied by an official statement that the plants comprising it were grown at a place of production at which no symptoms of Stolbur Disease mycoplasm have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation. (2) Where the consignment has been consigned to Northern Ireland from a third country, in addition to complying with the requirements of paragraph (1)

SCHEDULE 2

PART IA

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		the plants comprising it shall have been grown in the Euro-Mediterranean area.
10.	Plants of the family Gramineae.	The consignment shall not have been consigned to Northern Ireland from a third country.
11.	Plants of the Berberis species.	The plants shall be one of the following species or sub-species— Berberis aggregata Schn. Berberis dictyophylla Franch. Berberis koreana Palib. Berberis rubrostilla Chitt. Berberis wilsonae Hemsl. Berberis parvifolia Sprague. Berberis prattii Schn. Berberis thunbergii DC. All evergreen species.

PART IB

ROOTED PLANTS AND UNROOTED VEGETATIVE PROPAGATING MATERIAL OTHER THAN BULBS, CORMS, TUBERS OF POTATO AND SEEDS.
Additional conditions in particular cases

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
12.	Plants of the genus *Beta* L.	(1) The consignment shall be free from Beet Leaf Curl virus. (2) The consignment shall be accompanied by either: (*a*) an official statement that the plants comprising it were grown in a country in which Beet Leaf Curl virus is not known to occur; or (*b*) an official statement that the plants comprising it were grown in a region in which Beet Leaf Curl virus is not known to occur and at a place of production at which and in the immediate vicinity of which no symptoms of Beet Leaf Curl virus have been observed, during at least two official inspections carried out since the beginning of the last complete cycle of vegetation. (3) The consignment shall be accompanied by either: (*a*) an official statement that the plants comprising it were grown in an area within which during the last complete cycle of vegetation there has been no occurrence of Colorado Beetle (*Leptinotarsa decemlineata* (Say)) within 25 km of the place of production; or (*b*) an official statement that the plants comprising it have been cleaned so as to minimise contamination with soil and plant debris and to remove all fully expanded and unnecessary foliage. (4) The consignment shall not have been consigned to Northern Ireland from a third country.
13.	Plants of carnation (*Dianthus caryophyllus* L.)	(1) The consignment shall be free from: (*a*) Carnation Bacterial Leaf Spot (*Pseudomonas woodsii*, (E. F. Smith) Stev.);

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		(*b*) Carnation Wilts (*Erwinia chrysanthemi* pv. *dianthicola* (Hellmers) Dickey, *Fusarium oxysporum* Schlecht., *Phialophora cinerescens* (Woolenw.) V. Beyma and *Pseudomonas caryophylli* (Burkh.) Starr and Burkh.); and (*c*) Old World Bollworm (*Helicoverpa armigera* (Hübner)). (2) The consignment shall be accompanied by an official statement that the plants comprising it were: (*a*) derived in a direct line from mother plants which have been found to be free from Carnation Wilts (*Erwinia chrysanthemi* pv. *dianthicola* (Hellmers) Dickey, *Fusarium oxysporum* Schlecht., *Phialophora cinerescens* (Wollenw.) V. Beyma and *Pseudomonas caryophylli* (Burkh.) Starr and Burkh.) in officially approved tests carried out within the last two complete cycles of vegetation and which, during the same period, have been examined and found to be free from Carnation Bacterial Leaf Spot (*Pseudomonas woodsii* (E. F. Smith) Stev.); and (*b*) grown at a place of production at which no symptoms of Carnation Bacterial Leaf Spot (*Pseudomonas woodsii* (E. F. Smith) Stev.) or Carnation Wilts (*Erwinia chrysanthemi* pv *dianthicola* (Hellmers) Dickey, *Fusarium oxysporum* Schlecht., *Phialophora cinerescens* (Woolenw.) V. Beyma and *Pseudomonas caryophylli* (Burkh.) Starr and Burkh.) have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation. (3) Where the consignment has been consigned to Northern Ireland from a Member State, in addition to complying with the requirements of paragraphs (1)

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		and (2), it shall be accompanied by either: (*a*) an official statement that the plants comprising it were grown at a place of production which is known to have been free, since the beginning of the last complete cycle of vegetation, from African Carnation Tortrix (moth) (*Epichoristodes acerbella* (Walker)), Asian and Pacific Cutworm (*Spodoptera litura* (Fabricius)), Old World Bollworm (*Helicoverpa armigera* (Hübner)) and Mediterranean Climbing Cutworm (*Spodoptera littoralis* (Boisduval)); or (*b*) an official statement that the plants comprising it have been treated in accordance with officially approved methods for the eradication of African Carnation Tortrix (moth) (*Epichoristodes acerbella* (Walker)), Asian and Pacific Cutworm (*Spodoptera litura* (Fabricius)), Old World Bollworm (*Helicoverpa armigera* (Hübner)) and Mediterranean Climbing Cutworm (*Spodoptera littoralis* (Boisduval)). (4) Where the consignment has been consigned to Northern Ireland from a third country, in addition to complying with the requirements of paragraphs (1) and (2) it shall be accompanied by: (*a*) an official statement that the plants comprising it either: (i) were grown in a country which is known to be free from Asian and Pacific Cutworm (*Spodoptera litura* (Fabricius)), Old World Bollworm (*Helicoverpa armigera* (Hübner)), Mediterranean Climbing Cutworm (*Spodoptera littoralis* (Boisduval)) and Fall Armyworm (*Spodoptera frugiperda* (Smith)): or

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		(ii) have been subjected to cold storage at 1.5°C for not less than 10 days: or (*b*) an official statement that either: (i) the plants comprising it were grown in a country which is known to be free from African Carnation Tortrix (moth) (*Epichoristodes acerbella* (Walker)) and American Leafminers (*Liriomyza huidobrensis* (Blanchard) *L. sativae* Blanchard. *L. trifolii* (Burgess) and *Amauromyza maculosa* Malloch): or (ii) mother plants from which the plants comprising it were taken were subjected to regular official inspection during the three months prior to the date on which the consignment was despatched and were found free, in those inspections, from African Carnation Tortrix (moth) (*Epichoristodes acerbella* (Walker)) and American Leafminers (*Liriomyza huidobrensis* (Blanchard) *L. sativae* Blanchard, *L. trifolii* (Burgess) and *Amauromyza maculosa* Malloch): and (*c*) an official statement that the plants comprising it were officially inspected prior to export and found to be free from: (i) Carnation Tortrix (moth) (*Epichoristodes galeata* (Meyrick)); (ii) American Corn Earworm (*Helicoverpa zea* (Boddie)); (iii) *Helicoverpa assulta* (Guenée); (iv) Vegetable Mite (*Tetranychus neocaledonicus* (André)); and

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		(v) Southern Armyworm (*Spodoptera eridania* (Cramer)).
14.	Plants of florists' chrysanthemum (species, hybrids and cultivars of *Dendranthema* (DC.) Desmoul.) and other hosts of Chrysanthemum White Rust (*Puccinia horiana* P. Henn.).	(1) The consignment shall be free from: (*a*) Bacterial Blight (*Erwinia chrysanthemi* pv. *chrysanthemi* Burkh. *et al.*); (*b*) Chrysanthemum Midge (*Rhopalomyia chrysanthemi* (Ahlberg) syn. *Diarthronomyia chrysanthemi* (Ahlberg)); (*c*) Chrysanthemum Ray Blight (*Didymella chrysanthemi* (Tassi) Garibaldi and Gullino); (*d*) Chrysanthemum Stunt viroid; (*e*) Chrysanthemum White Rust (*Puccinia horiana* P. Henn.); and (*f*) Old World Bollworm (*Helicoverpa armigera* (Hübner)). (2) The consignment shall be accompanied by either: (*a*) an official statement that the plants comprising it are of no more than third generation stock which is derived from material which has been found to be free from Chrysanthemum Stunt viroid in officially approved tests; or (*b*) an official statement that the plants comprising it have been directly derived from material of which a representative sample of 30 plants or 10%, whichever is the greater, has been found to be free from Chrysanthemum Stunt viroid during an official inspection carried out at the time of flowering. (3) The consignment shall be accompanied by either: (*a*) an official statement that the plants comprising it were grown in a country in which Chrysanthemum White Rust (*Puccinia horiana* P. Henn.) is not known to occur; or

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		(*b*) an official statement that the plants comprising it were grown: (i) at a place of production which has been officially inspected, at least monthly, during the three months prior to the despatch of the plants and has been found to be free from Chrysanthemum White Rust (*Puccinia horiana* P. Henn.); and (ii) in an area within which during the three months prior to the despatch of the plants there has been no occurrence of Chrysanthemum White Rust (*Puccinia horiana* P. Henn.) within 800 metres of the place of production. (4) The consignment shall be accompanied by an official statement that: (*a*) in the case of unrooted cuttings, no symptoms of Chrysanthemum Ray Blight (*Didymella chrysanthemi* (Tassi) Garibaldi and Gullino) have been observed either in the cuttings or in the plants from which the cuttings were derived; or (*b*) in the case of rooted cuttings, no symptoms of Chrysanthemum Ray Blight (*Didymella chrysanthemi* (Tassi) Garibaldi and Gullino) have been observed either in the cuttings or in the rooting bed. (5) Where the consignment has been consigned to Northern Ireland from a Member State, in addition to complying with the requirements of paragraphs (1), (2), (3) and (4), it shall be accompanied by either: (*a*) an official statement that the plants comprising it were grown at a place of production which is known to have been free, since the beginning of the last complete cycle of vegetation, from African Carnation Tortrix

		were grown in a country which is known to be free from African Carnation Tortrix (moth) (*Epichoristodes acerbella* (Walker)) and American Leafminers (*Liriomyza huidobrensis* (Blanchard) *L. sativae* Blanchard, *L. trifolii* (Burgess) and *Amauromyza maculosa* Malloch); or (ii) the mother plants from which the plants comprising it were taken were subjected to regular official inspection during the three months prior to the date on which the consignment was despatched and were found free, in these inspections, from African Carnation Tortrix (moth) (*Epichoristodes acerbella* (Walker)) and American Leafminers (*Liriomyza huidobrensis* (Blanchard) *L. sativae* Blanchard, *L. trifolii* (Burgess) and *Amauromyza maculosa* Malloch); and (*c*) an official statement that the plants comprising it were officially inspected prior to export and found to be free from: (i) Carnation Tortrix (moth) (*Epichoristodes galeata* (Meyrick)); (ii) American Corn Earworm (*Helicoverpa zea* (Boddie)); (iii) *Helicoverpa assulta* (Guenée); (iv) Fall Armyworm (*Spodoptera frugiperda* (Smith)); (v) Vegetable Mite (*Tetranychus neocaledonicus* (André); and (vi) Southern Armyworm (*Spodoptera eridania* (Cramer)).

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
16.	Plants of the genera: *Acacia* Mill. *Acer* L. *Amelanchier* Medik. *Chaenomeles* Lindl. *Cotoneaster* Medik. *Crataegus* L. *Cydonia* Mill. *Euonymus* L. *Fagus* L. *Juglans* L. *Ligustrum* L. *Maclura* Nutt. *Malus* Mill. *Populus* L. *Prunus* L. *Ptelea* L. *Pyrus* L. *Ribes* L. *Rosa* L. *Salix* L. *Sorbus* L. *Symphoricarpos* Duham. *Syringa* L. *Tilia* L. *Ulmus* L. *Vitis* L.	(1) Between 16th April and 30th September (both dates inclusive) in each year the plants comprising the consignment shall have been grown in, consigned from and transported through third countries or regions of Member States in which San José Scale (*Comstockaspis perniciosa* (Comstock) syn. *Quadraspidiotus perniciosus* (Comstock)) is not known to occur. (2) Between 1st October and 15th April (both dates inclusive) in each year the plants comprising the consignment shall either: (*a*) have been grown in, consigned from and transported through third countries or regions of Member States in which San José Scale (*Comstockaspis perniciosa* (Comstock) syn. *Quadraspidiotus perniciosus* (Comstock)) is not known to occur; or (*b*) have been fumigated prior to export to Northern Ireland in accordance with one of the following methods: *Method 1* Fumigation with hydrocyanic acid gas at a concentration of 10 g/m^3 (i) at a temperature less than 15°C, for not less than 60 minutes; or (ii) at a temperature not less than 15°C or more than 25°C, for not less than 40 minutes; or (iii) at a temperature more than 25°C for not less than 30 minutes. *Method 2* Fumigation with methyl bromide gas for between 2 and 3 hours so that in any part of the consignment the product of the average concentration in grams per cubic metre and the exposure time in hours is not less than the value indicated in the following table:

SCHEDULE 2

PART IB

Item	Description of plants and plant products	Conditions subject to which landing is permitted	
		Temperature	*Concentration x time product* $g.h/m^3$
		Not less than 10°C or more than 15°C.	116
		More than 15°C but not more than 20°C.	104
		More than 20°C but not more than 25°C.	92
17.	Plants of azalea (*Rhododendron* L. *partim.*)	The consignment shall be free from: (*a*) Azalea Leafminer (*Caloptilia azaleella* (Brants) syn. *Gracilaria azaleella* Brants); and (*b*) Rhododendron Petal Blight (*Ovulinia azaleae* Weiss).	
18.	Plants of the genus *Camellia* L.	Where the consignment has been consigned to Northern Ireland from a third country, it shall: (*a*) be free from Camellia Petal Blight (*Sclerotinia camelliae* Hara); and (*b*) be accompanied by an official statement that the plants comprising it were grown at a place of production at which no symptoms of Camellia Petal Blight (*Sclerotinia camelliae* Hara) have been observed in the flowers of the plants during at least one official inspection carried out since the beginning of the last complete cycle of vegetation.	
19.	Plants of the genera: *Cotoneaster* Medik. *Crataegus* L. *Cydonia* Mill. *Malus* Mill. *Pyracantha* M. Roem. *Pyrus* L. *Sorbus* L. *Stranvaesia* Lindl.	The consignment shall be accompanied by an official statement that the plants comprising it were grown: (*a*) at a place of production at which and in the immediate vicinity of which no symptoms of Fireblight (*Erwinia amylovora* (Burr.) Winsl. *et al.*) have been observed during at least one official inspection carried out in each of the last two complete cycles of vegetation; and	

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		(*b*) in an area within which since the beginning of the last two complete cycles of vegetation Fireblight (*Erwinia amylovora* (Burr.) Winsl. *et al.*) has not been known to occur within 5 km of the place of production.
20.	*Plants of the genera:* *Chaenomeles* Lindl. *Crataegus* L. *Cydonia* Mill. *Eriobotrya* Lindl. *Malus* Mill. *Prunus* L. *Pyrus* L.	Where the consignment has been consigned to Northern Ireland from a third country and the plants comprising it were grown in Egypt, any country in Central America or North America or in another country in which Fruit Brown Rot (*Monilinia fructicola* (Wint.) Honey) is known to occur, the consignment shall be accompanied by an official statement that the plants comprising it were grown in a region in which Fruit Brown Rot (*Monilinia fructicola* (Wint.) Honey) is not known to occur.
21.	Plants of the genus *Prunus* L.	(1) The consignment shall be free from: (*a*) Peach Twig Borer (*Anarsia lineatella* Zeller); and (*b*) Bacterial Spot of *Prunus* (*Xanthomonas campestris* pv. *pruni* (E. F. Smith) Dye). (2) The consignment shall be accompanied by an official statement that the plants comprising it were grown at a place of production at which no symptoms of: (*a*) Apricot Chlorotic Leafroll Disease mycoplasm; and (*b*) viruses, or virus-like pathogens of a description specified in paragraph (1)(*p*) of Part IV of Schedule I; have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation. (3) The consignment shall be accompanied by either: (*a*) an official statement that the plants comprising it were grown in a country in which Tomato Ring Spot virus is not known to occur in *Prunus* species and in

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		which Cherry Rasp Leaf virus (American), Peach Mosaic virus (American), Peach Phony Disease rickettsia, Peach Rosette Disease mycoplasm, Peach Yellows Disease mycoplasm, Plum Line Pattern virus (American) and X Disease mycoplasm are not known to occur; or (*b*) an official statement: (i) that the plants comprising it, other than those raised from seed, were officially certified under a certification scheme requiring them to be derived in a direct line from material which has been maintained under appropriate conditions and which has been subjected to regular official testing for at least Cherry Rasp Leaf virus (American), Peach Mosaic virus (American), Peach Phony Disease rickettsia, Peach Rosette Disease mycoplasm, Peach Yellows Disease mycoplasm, Plum Line Pattern virus (American), Tomato Ring Spot virus and X Disease mycoplasm using appropriate indicators or equivalent methods and has been found free, in those tests, from those viruses and virus-like pathogens; or (ii) that the plants comprising it, other than those raised from seed, were derived in a direct line from material which has been maintained under appropriate conditions and which has been subjected, within the last three complete cycles of vegetation, at least once to official virological testing for at least Cherry Rasp Leaf virus (American), Peach Mosaic virus (American), Peach

SCHEDULE 2

PART IB

		production at which no symptoms of Bacterial Spot (*Xanthomonas campestris* pv. *pruni* (E. F. Smith) Dye) have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation; and (*b*) be free from: (i) Apple Curculio (*Tachypterellus quadrigibbus* (Say)); (ii) Cherry Fruit Worm (*Enarmonia packardi* (Zeller)); (iii) Lesser Apple Worm (*Enarmonia prunivora* (Walsh)); and (iv) Western Cherry Fruit Fly (*Rhagoletis indifferens* (Curran)).
22.	Plants of sour cherry (*Prunus cerasus* L.), sweet cherry (*Prunus avium* L.) and ornamental cherry (*Prunus incisa* Thunb., *Prunus sargentii* Rehd., *Prunus serrula* Franch., *Prunus serrulata* Lindl., *Prunus speciosa* (Koidz.) Ingram, *Prunus subhirtella* Miq., *Prunus yedoensis* Matsum.) and hybrids and cultivars thereof.	Where the plants comprising the consignment were grown in a country outside Europe in which Little Cherry Disease pathogen is known to occur, it shall: (*a*) be free from Little Cherry Disease pathogen; and (*b*) be accompanied by an official statement: (i) that the plants comprising it were officially certified under a certification scheme requiring them to be derived in a direct line from material which has been maintained under appropriate conditions and subjected to regular official testing for at least Little Cherry Disease pathogen using appropriate indicators or equivalent methods and has been found free, in those tests, from that pathogen; or (ii) that the plants comprising it were derived in a direct line

SCHEDULE 2

PART IB

		from material which has been maintained under appropriate conditions and has been subjected, within the last three complete cycles of vegetation, at least once, to official testing for at least Little Cherry Disease pathogen using appropriate indicators or equivalent methods and has been found free, in those tests, from that pathogen; and (iii) that no symptoms of Little Cherry Disease pathogen have been observed in the plants comprising it or in other susceptible plants at the place of production during at least one official inspection carried out in each of the last three complete cycles of vegetation.
23.	Plants of sweet cherry (*Prunus avium* L.)	(1) The consignment shall be free from Cherry Necrotic Rusty Mottle virus. (2) The consignment shall be accompanied by an official statement that the plants comprising it were grown at a place of production at which no symptoms of Cherry Necrotic Rusty Mottle virus have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation.
24.	Plants of: *Prunus armeniaca* L. *Prunus blireiana* André *Prunus brigantina* Vill. *Prunus cerasifera* Ehrh. *Prunus cistena* N. E. Hansen *Prunus domestica* subsp. *domestica* L. *Prunus domestica* subsp. *insititia* (L.) C. K. Schneider (syn. *Prunus domestica* subsp. *italica* (Borkh.) Hegi) *Prunus dulcis* (Mill.) D. A. Webb (syn. *Prunus amygdalus* Batsch.)	(1) The consignment shall be accompanied by either: (*a*) an official statement that the plants comprising it were grown in a country in which Plum Pox (Sharka) virus is not known to occur; or (*b*) an official statement: (i) that the plants comprising it, other than those raised from seed, were officially certified under a

	Prunus glandulosa Thunb. *Prunus holosericea* Batal. *Prunus hortulana* Bailey *Prunus kurdica* Fenzl ex Fritsch *Prunus japonica* Thunb. *Prunus mandshurica* (Maxim.) Koehne *Prunus maritima* Marsh *Prunus mume* (Sieb.) Sieb. and Zucc. *Prunus nigra* Ait. *Prunus persica* (L.) Batsch. *Prunus salicina* Lindl. *Prunus sibirica* L. *Prunus simonii* Carr. *Prunus spinosa* L. *Prunus tomentosa* Thunb. *Prunus triloba* Lindl. and other *Prunus* species susceptible to Plum Pox (Sharka) virus.	certification scheme requiring them to be derived in a direct line from material which has been maintained under appropriate conditions and subjected to regular official virological testing for at least Plum Pox (Sharka) virus using appropriate indicators or equivalent methods and has been found free, in those tests, from that virus; or (ii) that the plants comprising it, other than those raised from seed, were derived in a direct line from material which has been maintained under appropriate conditions and which has been subjected, within the last three complete cycles of vegetation, at least once to official virological testing for at least Plum Pox (Sharka) virus using appropriate indicators or equivalent methods and has been found free, in those tests, from that virus; and (iii) that no symptoms of Plum Pox (Sharka) virus have been observed in the plants comprising it or in other susceptible plants at the place of production and in its immediate vicinity during at least one official inspection carried out in each of the last three complete cycles of vegetation; and (iv) that the plants comprising it were grown at a place of production at which since the beginning of the last complete cycle of vegetation all plants which have shown symptoms of infection with any virus or virus-like pathogen other than Plum Pox (Sharka) virus have been removed.

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		(2) Where the consignment has been consigned to Northern Ireland from a third country, in addition to complying with the requirements of paragraph (1), the plants comprising it shall have been grown in a Member State, Algeria, Canada, Egypt, Finland, Israel, Lebanon, Libya, Morocco, Norway, Syria, Sweden, Tunisia or any of the States of the United States of America except Hawaii.
25.	Plants of the genus *Malus* Mill.	(1) The consignment shall be free from Peach Twig Borer (*Anarsia lineatella* Zell.). (2) The consignment shall be accompanied by an official statement that the plants comprising it were grown at a place of production at which no symptoms of viruses, or virus-like pathogens of a description specified in paragraph (1)(*p*) of Part IV of Schedule 1 have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation. (3) The consignment shall be accompanied by either: (*a*) an official statement that the plants comprising it were grown in a country in which neither Cherry Rasp Leaf virus (American) nor Tomato Ring Spot virus is known to occur in the genus *Malus* Mill.; or (*b*) an official statement: (i) that the plants comprising it, other than those raised from seed, were officially classified under a classification scheme requiring them to be derived in a direct line from material which has been maintained under appropriate conditions and subjected to regular official testing for at least Cherry Rasp Leaf virus (American) and Tomato Ring Spot virus using appropriate indicators or equivalent methods and has been found free, in

SCHEDULE 2

		its immediate vicinity during at least one official inspection carried out in each of the last three complete cycles of vegetation.
27.	Plants of the genera: *Cydonia* Mill. *Pyrus* L.	(1) The consignment shall be free from Peach Twig Borer (*Anarsia lineatella* Zeller). (2) Where the consignment has been consigned to Northern Ireland from a third country, the plants comprising it shall have been grown in a Member State, Algeria, Canada, Egypt, Finland, Israel, Lebanon, Libya, Morocco, Norway, Syria, Sweden, Tunisia or any of the States of the United States of America except Hawaii. (3) Where the consignment has been consigned to Northern Ireland from a third country, it shall be free from: (*a*) Apple Curculio (*Tachypterellus quadrigibbus* (Say)); (*b*) Cherry Fruit Worm (*Enarmonia packardi* Zeller); (*c*) Lesser Apple Worm (*Enarmonia prunivora* (Walsh)); and (*d*) Western Cherry Fruit Fly (*Rhagoletis indifferens* (Curran)).
28.	Plants of pear (*Pyrus communis* L.) and quince (*Cydonia oblonga* Mill.)	The consignment shall be accompanied by an official statement that the plants comprising it were grown either: (*a*) in a country which is known to be free from Pear Decline Disease mycoplasm; or (*b*) at a place of production at which and in the immediate vicinity of which upon official inspection all plants which have shown symptoms of Pear Decline Disease mycoplasm have been removed during each of the last three complete cycles of vegetation that the plants were at that place; and (*c*) at a place of production at which no symptoms of viruses or

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		virus-like pathogens of a description specified in paragraph (1)(*p*) of Part IV of Schedule 1 have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation.
29.	Plants of the genus *Rubus* L.	(1) The consignment shall be free from: (*a*) Arabis Mosaic virus; (*b*) Black Raspberry Latent virus; (*c*) Cherry Leaf Roll virus; (*d*) Prunus Necrotic Ring Spot virus; (*e*) Raspberry Ring Spot virus; (*f*) Strawberry Latent Ring Spot virus; (*g*) Tomato Black Ring virus; and (*h*) Peach Twig Borer (*Anarsia lineatella* Zeller). (2) The consignment shall be accompanied by an official statement that the plants comprising it were grown at a place of production at which no symptoms of: (*a*) Arabis Mosaic virus; (*b*) Raspberry Ring Spot virus; (*c*) Strawberry Latent Ring Spot virus; (*d*) Tomato Black Ring virus; and (*e*) viruses, or virus-like pathogens of a description specified in paragraph (1)(*p*) of Part IV of Schedule 1 have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation. (3) Where the plants comprising it were grown in a country in which Black Raspberry Latent virus, Cherry Leaf Roll virus, Prunus Necrotic Ring Spot virus, Raspberry Leaf Curl viruses (American) or Tomato Ring Spot virus are known to occur in *Rubus* L. the consignment shall be free from aphids and aphid eggs.

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		(4) The consignment shall be accompanied by either: (*a*) an official statement that the plants comprising it were grown in a country in which Black Raspberry Latent virus, Cherry Leaf Roll virus, Prunus Necrotic Ring Spot virus, Raspberry Leaf Curl viruses (American) and Tomato Ring Spot virus are not known to occur in plants of the genus *Rubus* L.; or (*b*) an official statement: (i) that the plants comprising it were officially certified under a certification scheme requiring them to be derived in a direct line from material which has been maintained under appropriate conditions and subjected to regular official testing for at least Black Raspberry Latent virus, Cherry Leaf Roll virus, Prunus Necrotic Ring Spot virus, Raspberry Leaf Curl viruses (American) and Tomato Ring Spot virus using appropriate indicators or equivalent methods and has been found free, in those tests, from those viruses; or (ii) that the plants comprising it were derived in a direct line from material which has been maintained under appropriate conditions and which has been subjected, within the last three complete cycles of vegetation, at least once, to official testing for at least Black Raspberry Latent virus, Cherry Leaf Roll virus, Prunus Necrotic Ring Spot virus, Raspberry Leaf Curl viruses (American) and Tomato Ring Spot virus using appropriate indicators or equivalent methods and has been found free, in those tests, from those viruses; and

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		(iii) that no symptoms of Black Raspberry Latent virus, Cherry Leaf Roll virus, Prunus Necrotic Ring Spot virus, Raspberry Leaf Curl viruses (American) or Tomato Ring Spot virus have been observed in the plants comprising it or in other plants of the genus *Rubus* L. at the place of production or in its immediate vicinity during at least one official inspection carried out since the beginning of the last complete cycle of vegetation. (5) Where the consignment has been consigned to Northern Ireland from a third country, in addition to complying with the requirements of paragraphs (1), (2), (3) and (4), it shall be free from: (*a*) North American Currant Fruit Flies (*Epochra canadensis* (Loew) and *Rhagoletis ribicola* Doane); and (*b*) Queensland Fruit Fly (*Dacus tryoni* (Frogatt)).
30.	Plants of the genus *Ribes* L.	(1) The consignment shall be free from Peach Twig Borer (*Anarsia lineatella* Zeller). (2) The consignment shall be accompanied by an official statement that the plants comprising it were grown at a place of production at which no symptoms of viruses or virus-like pathogens of a description specified in paragraph (1)(*p*) of Part IV of Schedule 1 have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation. (3) Where the consignment has been consigned to Northern Ireland from a third country, in addition to complying with the requirements of paragraphs (1) and (2) it shall be free from North American Currant Fruit Flies (*Epochra canadensis* (Loew) and *Rhagoletis ribicola* Doane).

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
31.	Plants of the genus *Vaccinium* L.,	Where the consignment has been consigned to Northern Ireland from a third country it shall be free from Blueberry Maggot (*Rhagoletis mendax* Curran).
32.	Plants of strawberry (species, hybrids and cultivars of *Fragaria* L.)	(1) The consignment shall be free from: (*a*) Strawberry Red Core (*Phytophthora fragariae* Hickman); (*b*) Arabis Mosaic virus; (*c*) Raspberry Ring Spot virus; (*d*) Strawberry Crinkle virus; (*e*) Strawberry Latent Ring Spot virus; (*f*) Strawberry Yellow Edge virus (complex); and (*g*) Tomato Black Ring virus. (2) The consignment shall be accompanied by an official statement that the plants comprising it were grown at a place of production at which no symptoms of: (*a*) Strawberry Red Core (*Phytophthora fragariae* Hickman); (*b*) Arabis Mosaic virus; (*c*) Raspberry Ring Spot virus; (*d*) Strawberry Latent Ring Spot virus; (*e*) Tomato Black Ring virus; or (*f*) viruses, or virus-like pathogens of a description specified in paragraph (1)(*p*) of Part IV of Schedule 1; have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation. (3) The consignment shall be accompanied by either: (*a*) an official statement that the plants comprising it were grown in a country in which Strawberry Crinkle virus, Strawberry Latent C virus, Strawberry Vein Banding virus, Strawberry Witches' Broom Disease mycoplasm and Strawberry

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		Yellow Edge virus (complex) are not known to occur; or (*b*) by an official statement: (i) that the plants comprising it were either officially certified under a certification scheme requiring them to be derived in a direct line from material which has been maintained under appropriate conditions and subjected to regular official testing for at least Strawberry Crinkle virus, Strawberry Latent C virus, Strawberry Vein Banding virus, Strawberry Witches' Broom Disease mycoplasm and Strawberry Yellow Edge virus (complex) using appropriate indicators or equivalent methods and has been found free, in those tests, from those viruses and that virus-like pathogen; or (ii) that the plants comprising it were derived in a direct line from material which has been maintained under appropriate conditions and which has been subjected, within the last three complete cycles of vegetation, at least once, to official testing for at least Strawberry Crinkle virus, Strawberry Latent C virus, Strawberry Vein Banding virus, Strawberry Witches' Broom Disease mycoplasm and Strawberry Yellow Edge virus (complex) using appropriate indicators or equivalent methods and has been found free, in those tests, from those viruses and that virus-like pathogen; and (iii) that no symptoms of Strawberry Crinkle virus, Strawberry Latent C virus, Strawberry Vein Banding

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		virus, Strawberry Witches' Broom Disease mycoplasm or Strawberry Yellow Edge virus (complex) have been observed in the plants comprising it or in other susceptible plants at the place of production or in its immediate vicinity during at least one official inspection carried out since the beginning of the last complete cycle of vegetation. (4) Where the consignment has been consigned to Northern Ireland from a third country, in addition to complying with the requirements of paragraphs (1), (2) and (3): (*a*) it shall be free from dead leaves and plant debris; (*b*) the plants comprising it shall have been grown in Africa, Europe or in one of the following countries: Australia, Canada, Israel, Lebanon, New Zealand, Syria, Turkey, any of the States of the United States of America except Hawaii; (*c*) the plants comprising it, if they were grown elsewhere than in Europe, shall have been grown in a region which is known to be free from Strawberry Weevils (*Anthonomus signatus* (Say) and *Anthonomus bisignifer* Schenkling); (*d*) it shall be accompanied by an official statement that the plants comprising it were grown at a place of production at which no symptoms of Strawberry Angular Leafspot (*Xanthomonas fragariae* Kennedy and King) have been observed in plants during at least one official inspection carried out since the beginning of the last complete cycle of vegetation; and (*e*) it shall be accompanied by an official statement that the plants comprising it were:

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		(i) derived in a direct line from mother plants which have been officially inspected and found to be free from Strawberry Red Core (*Phytophthora fragariae* Hickman); and (ii) grown at a place of production: — in respect of which records have been maintained for no less than thirty years which records show that Strawberry Red Core (*Phytophthora fragariae* Hickman) has not occurred on that land during that period; or — which has been tested and found to be free from *Phytophthora fragariae* Hickman the cause of Strawberry Red Core.
33.	Plants of rose (species, hybrids and cultivars of *Rosa* L.)	The consignment shall be accompanied by an official statement that the plants comprising it were taken from a crop in which no symptoms of Rose Wilt Disease pathogen (syn. Rose Dieback, Rose Leaf Curl, Rose Proliferation, Rose Spring Dwarf and Rose Stunt) have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation.
34.	Plants of grapevine (*Vitis* L.)	(1) The consignment shall be free from: (*a*) Vine Black Rot (*Guignardia baccae* (Cav.) Jacz. syn. *Glomerella cingulata* (Stonem.) Spauld. and V. Schrenk.); and (*b*) Grape phylloxera (*Daktulosphaira vitifoliae* (Fitch)). (2) The consignment shall be accompanied by an official statement that the plants comprising it were grown at a place of production at which no symptoms of harmful viruses and

SCHEDULE 2

PART IB

		virus-like pathogens of grapevine have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation. (3) Where the consignment has been consigned to Northern Ireland from a third country, in addition to complying with the requirements of paragraphs (1) and (2), it shall: (*a*) be free from: (i) Vine Black Rot (*Guignardia bidwellii* (Ellis) Viala and Ravaz); and (ii) Canker of Grapevine (*Xanthomonas ampelina* Panogopoulos); and (*b*) be accompanied by an official statement that the plants comprising it were grown at a place of production at which no symptoms of Vine Black Rot caused by *Guignardia baccae* (Cav.) Jacz. (syn. *Glomerella cingulata* (Stonem.) Spauld. and V. Schrenk.) or *Guignardia bidwellii* (Ellis) Viala and Ravaz or Canker of Grapevine (*Xanthomonas ampelina* Panogopoulos) have been observed in plants during at least one official inspection carried out since the beginning of the last complete cycle of vegetation.
35.	Plants of hop (*Humulus lupulus* L.)	The consignment shall be: (*a*) free from Verticillium Wilt of Hop (*Verticillium albo-atrum* (Reinke and Berth.)); and (*b*) accompanied by an official statement that the plants comprising it, the mother plants from which they were taken and the place of production at which they were grown have been officially inspected at least once since the beginning of the last complete cycle of vegetation

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		and found to be free from symptoms of Verticillium Wilt of Hop (*Verticillium albo-atrum* (Reinke and Berth.)).
36.	Plants of tomato (*Lycopersicon esculentum* Mill. and hybrids and cultivars thereof).	(1) The consignment shall be free from: (*a*) Bacterial Canker of Tomato (*Corynebacterium michiganense* pv. *michiganense* (E. F. Smith) Jensen); (*b*) Bacterial Spot of Pepper and Tomato (*Xanthomonas campestris* pv. *vesicatoria* (Doidge) Dye); (*c*) Old World Bollworm (*Helicoverpa armigera* (Hübner)); (*d*) Potato Brown Rot (*Pseudomonas solanacearum* (E. F. Smith) E. F. Smith); and (*e*) Potato Spindle Tuber viroid (syn. Tomato Bunchy Top viroid). (2) Where the consignment has been consigned to Northern Ireland from a third country, in addition to complying with the requirements of paragraph (1), it shall be accompanied by an official statement that the plants comprising it were grown either: (*a*) in a region which is known to be free from Potato Spindle Tuber viroid (syn. Tomato Bunchy Top viroid); or (*b*) at a place of production at which no symptoms of Potato Spindle Tuber viroid (syn. Tomato Bunchy Top viroid) have been observed in plants during at least one official inspection carried out since the beginning of the last complete cycle of vegetation.
37.	Plants of aubergine (*Solanum melongena* L.).	The consignment shall be free from Potato Brown Rot (*Pseudomonas solanacearum* (E. F. Smith) E. F. Smith).
38.	Rhizomes of iris (*Iris* L.).	The consignment shall be free from Botrytis Rot of Iris (*Sclerotinia convoluta* Drayt.).

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
39.	Plants of leek (*Allium ampeloprasum* var. *porrum* (L.) Gay) and chive (*Allium schoenoprasum* L.).	(1) The consignment shall be free from Stem Nematode (*Ditylenchus dipsaci* (Kühn) Filipjev). (2) Where the consignment has been consigned to Northern Ireland from a third country, in addition to complying with the requirements of paragraph (1), it shall be free from Allium Leaftip Dieback (*Mycosphaerella schoenoprasi* (Auersw.) Schroet) and Smut (*Ustilago allii* McAlp.).
40.	Plants of trees and shrubs of *Castanea* Mill.	The consignment shall be accompanied by an official statement that the plants comprising it were grown at a place of production at which and in the immediate vicinity of which no symptoms of Chestnut Blight (*Endothia parasitica* (Murrill) P. J. & H. W. Anderson) have been observed since the beginning of the last complete cycle of vegetation.
41.	Plants of trees and shrubs of *Pinus* L. other than fruit and seeds.	The consignment shall be accompanied by an official statement that the plants comprising it: (*a*) were grown at a place of production at which and in the immediate vicinity of which no symptoms of Pine-Oak Gall Rust (*Cronartium quercuum* (Berk.) Miyabe ex Shirai) have been observed since the beginning of the last complete cycle of vegetation; (*b*) were grown at a place of production free from Pine Top Canker (*Scleroderris lagerbergii* Gremmen): and (*c*) are free from *Atropellis* spp the cause of Atropellis Canker.
42.	Plants of trees and shrubs of *Populus* L. other than fruit and seeds.	The consignment shall be accompanied by an official statement that the plants comprising it were grown at a place of production at which and in the immediate vicinity of which no symptoms of Poplar Canker (*Mycosphaerella populorum* Thomp. (syn. *Septoria musiva* Peck)) have been observed since the beginning of the last complete cycle of vegetation.

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
43.	Plants of trees and shrubs of *Quercus* L.	(1) In the case of a consignment containing plants grown in any country in Europe other than Romania or the Union of Soviet Socialist Republics, it shall be accompanied by an official statement that the plants comprising it were grown at a place of production at which and in the immediate vicinity of which no symptoms of Chestnut Blight (*Endothia parasitica* (Murrill) P. J. & H. W. Anderson) or Pine-Oak Gall Rust (*Cronartium quercuum* (Berk Miyabe ex Shirai) have been observed since the beginning of the last complete cycle of vegetation. (2) In the case of a consignment containing plants grown in Romania or the Union of Soviet Socialist Republics, it shall be accompanied by an official statement that the plants comprising it were grown: (*a*) at a place of production at which and in the immediate vicinity of which no symptoms of Chestnut Blight (*Endothia parasitica* (Murrill) P. J. & H. W. Anderson) or Pine-Oak Gall Rust (*Cronartium quercuum* (Berk.) Miyabe ex Shirai) have been observed since the beginning of the last complete cycle of vegetation; (*b*) in regions known to be free from Oak Wilt (*Ceratocystis fagacearum* (Bretz) Hunt) and Oak Vascular mycosis (*Ophiostoma* (*Ceratocystis*) *roboris* C. Georgescu & I. Teodoru).
44.	Plants of trees and shrubs of *Ulmus* L. and *Zelkova* spach. other than fruit and seeds.	The consignment shall be accompanied by an official statement that the plants comprising it were grown at a place of production at which and in the immediate vicinity of which no symptoms of Dutch Elm Disease (*Ceratocystis ulmi* (Buism.) C. Moreau) have been observed since the beginning of the last complete cycle of vegetation.
45.	Plants of trees and shrubs of *Larix* Mill. other than fruit and seeds.	The consignment shall be accompanied by an official statement that the plants comprising it were grown at a place of production free from Larch Sawfly (*Cephalcia alpina* (Klug)).

SCHEDULE 2

PART IB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
46.	Plants of trees and shrubs of *Picea* A. Dietr other than fruit and seeds.	The consignment shall be accompanied by an official statement that the plants comprising it were grown at a place of production free from Pine Top Canker (*Scleroderris lagerbergii* Gremmen).
47.	Plants of trees and shrubs of *Picea* A. Dietr for planting other than seeds.	The consignment shall be accompanied by an official statement that the plants comprising it were grown at a place of production free from European Spruce Sawfly (*Gilpinia hercyniae* Hartig) and Small Spruce Sawfly (*Pristiphora abietina* (Christ)).

PART IIA

BULBS AND CORMS FOR PLANTING

General Conditions

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
48.	All bulbs and corms for planting	(1). The consignment shall be accompanied by a phytosanitary certificate and, as appropriate, one or more re-forwarding phytosanitary certificates in accordance with the provisions of Article 7 or 8 and Article 10. (2) The consignment shall be free from the pests set out in Schedule 1. (3) Where the consignment has been consigned from a Member State and the plants comprising it were grown outside Europe and are not free from soil, in addition to complying with the requirements of paragraphs (1) and (2), it shall be accompanied by an official statement that the soil attached to the plants has been found to be free from pests. (4) Where the consignment has been consigned to Northern Ireland from a third country and the plants comprising it were grown in the Euro-Mediterranean area and are not free from soil, in addition to complying with the requirements of paragraphs (1) and (2) it shall be accompanied by an official statement that the soil attached to the plants has been found to be free from pests. (5) Where the consignment has been consigned to Northern Ireland from a third country and the plants comprising it were grown outside the Euro-Mediterranean area, in addition to complying with the requirements of paragraphs (1) and (2), the plants comprising it shall have been freed within 14 days prior to export from the medium in which they were grown and if new growing medium or packing material is added it shall be free from pests and soil.
49.	All flower bulbs	The consignment shall be free from: (*a*) Large Narcissus Fly (*Merodon equestris* (Fabricius)); (*b*) Stem Nematode (*Ditylenchus dipsaci* (Kühn) Filipjev);

SCHEDULE 2

PART IIA

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		(*c*) Potato Tuber Nematode (*Ditylenchus destructor* Thorne); and (*d*) Hyacinth Black Slime (*Sclerotinia bulborum* (Wakk.) Rehm).
50.	All flower corms	The consignment shall be free from: (*a*) Large Narcissus Fly (*Merodon equestris* (Fabricius)); (*b*) Gladiolus Hard Rot (*Septoria gladioli* Pass.); and (*c*) Gladiolus Dry Rot (*Stromatinia gladioli* (Drayton) Whetzel).

PART IIB

BULBS AND CORMS FOR PLANTING

Additional conditions in the case of corms of Gladiolus and bulbs of the genera *Tulipa* L. and *Narcissus* L.

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
51.	Corms of gladiolus (*Gladiolus* L.)	(1) The consignment shall be free from: (*a*) Fusarium Yellows and Corm Rot (*Fusarium oxysporum* Schlecht. f. sp. *gladioli* (Massey) Snyder and Hansen); (*b*) Gladiolus Scab and Neck Rot (*Pseudomonas gladioli* Severini); and (*c*) Gladiolus Rusts (*Uromyces* spp.). (2) The consignment shall be accompanied by either: (*a*) an official statement that the corms comprising it originate in a country known to be free from Gladiolus Rusts (*Uromyces* spp.); or (*b*) an official statement that the corms comprising it were grown at a place of production at which no symptoms of Gladiolus Rusts (*Uromyces* spp.) have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation.
52.	Bulbs of the genera *Tulipa* L. and *Narcissus* L.	The consignment shall be accompanied by an official statement that the bulbs comprising it were taken from a crop in which no symptoms of Stem Nematode (*Ditylenchus dipsaci* (Kühn) Filipjev) have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation.

PART IIC

BULBS AND CORMS FOR PLANTING

Additional conditions in the case of bulbs of the genus *Allium* L., corms of Freesia and Crocus and bulbs of Iris.

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
53.	Bulbs of the genus *Allium* L.	(1) The consignment shall be free from Stem Nematode (*Ditylenchus dipsaci* (Kühn) Filipjev). (2) Where the consignment has been consigned to Northern Ireland from a third country, in addition to complying with the requirements of paragraph (1), it shall be free from: (*a*) Allium Leaftip Dieback (*Mycosphaerella schoenoprasi* (Auersw.) Schroet)); and (*b*) Smut (*Ustilago allii* McAlp.). (3) The consignment shall be accompanied by an official statement that the bulbs comprising it were grown at a place of production at which no symptoms of Onion and Leek Smut (*Urocystis cepulae* (Frost)) have been found since the beginning of the last complete cycle of vegetation.
54.	Corms of freesia (*Freesia* Klatt.).	The consignment shall be free from: (*a*) Fusarium Yellows and Corm Rot (*Fusarium oxysporum* Schlecht. f. sp. *gladioli* (Massey) Snyder and Hansen); and (*b*) Gladiolus Scab and Neck Rot (*Pseudomonas gladioli* Severini).
55.	Corms of crocus (*Crocus* L.) and bulbs of iris (*Iris* L.)	The consignment shall be free from Fusarium Yellows and Corm Rot (*Fusarium oxysporum* Schlecht. f. sp. *gladioli* (Massey) Snyder and Hansen).

PART IIIA

SEEDS

General Conditions

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
56.	All seeds (except for true seeds of potato)	The consignment shall be free from the pests set out in Schedule 1.

PART IIIB

SEEDS

Additional conditions in the case of seeds of lettuce, lucerne, pea and tomato and of the genus *Rubus* L.

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
57.	Seeds of: lettuce (*Lactuca sativa* L.) lucerne (*Medicago sativa* L.) pea (*Pisum sativum* L.) species of *Rubus* L. tomato (*Lycopersicon esculentum* Mill. and hybrids and cultivars thereof) for sowing.	The consignment shall be accompanied by a phytosanitary certificate and, as appropriate, one or more re-forwarding phytosanitary certificates in accordance with the provisions of Article 7 or 8 and Article 10.
58.	Seeds of lettuce (*Lactuca sativa* L.) for sowing.	The consignment shall be accompanied by an official statement that in a representative sample of the seeds comprising it no Lettuce Mosaic virus was found when: (i) not less than 3,000 seedlings were grown under officially approved conditions; or (ii) not less than 5,000 seeds were inoculated to suitable indicator plants or were tested by equivalent methods.
59.	Seeds of lucerne (*Medicago sativa* L.) for sowing.	(1) The consignment shall be free from: (*a*) Stem Nematode (*Ditylenchus dipsaci* (Kühn) Filipjev); (*b*) Bacterial Wilt of Lucerne (*Corynebacterium michiganense* pv. *insidiosum* (McCull.) Dye and Kemp); and (*c*) Verticillium Wilt (*Verticillium albo-atrum* Reinke and Berth.). (2) The consignment shall be accompanied by either: (*a*) an official statement that the seeds comprising it were fumigated prior to export for the control of Stem Nematode (*Ditylenchus dipsaci* (Kühn) Filipjev) in accordance with the following method: Fumigation with methyl bromide gas for between 20 and 30 hours at a concentration such that in any part of the consignment the product of the average concentration is g/m³ and the exposure time in hours is not

SCHEDULE 2

PART IIIB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		less than the value indicated in the following table: *Temperature* — *Concentration x time product ($g.h/m^3$)* Not less than 10°C or more than 20°C — 1200 More than 20°C but not more than 25°C — 1000 More than 25°C but not more than 30°C — 800; or (*b*) an official statement that the seeds comprising it were taken from a crop grown at a place of production at which since the beginning of the last complete cycle of vegetation no symptoms of Stem Nematode (*Ditylenchus dipsaci* (Kühn) Filipjev) have been observed and were found to be free from Stem Nematode in laboratory tests on a representative sample of the seed. (3) The consignment shall be accompanied by either: (*a*) an official statement that the seeds comprising it were taken from a crop which was grown in a country in which Bacterial Wilt of Lucerne (*Corynebacterium michiganense* pv. *insidiosum* (McCull.) Dye and Kemp) is not known to occur; or (*b*) an official statement that the seeds comprising it were taken from a crop which was: (i) grown at a place of production at which and in the immediate vicinity of which Bacterial Wilt of Lucerne (*Corynebacterium michiganense* pv. *insidiosum* (McCull.) Dye and Kemp) is not known to have occurred during the ten years prior to the date on which the phytosanitary certificate accompanying the consignment was issued; (ii) in its first or second cycle of vegetation from sowing when the crop was harvested;

SCHEDULE 2

PART IIIB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		were taken from plants which either: — were certified under a certification scheme requiring them to be directly derived from material which has been maintained under appropriate conditions and subjected to regular official testing for at least Black Raspberry Latent virus, Cherry Leaf Roll virus, Prunus Necrotic Ring Spot virus and Tomato Ring Spot virus and has been found free, in those tests, from those viruses; or — were directly derived from material which has been maintained under appropriate conditions and which has been subjected, within the last three complete cycles of vegetation, at least once, to official testing for at least Black Raspberry Latent virus, Cherry Leaf Roll virus, Prunus Necrotic Ring Spot virus and Tomato Ring Spot virus and has been found free, in those tests, from those viruses; and (ii) that no symptoms of Black Raspberry Latent virus, Cherry Leaf Roll virus, Prunus Necrotic Ring Spot virus or Tomato Ring Spot virus have been observed in the plants from which the seeds comprising it were taken or in other plants of the genus *Rubus* L. at the place of production or in its immediate vicinity during at least one official inspection carried out in each of the last three complete cycles of vegetation.
62.	Seeds of tomato (*Lycopersicon esculentum* Mill. and hybrids and cultivars thereof) for sowing	(1) The consignment shall be free from: (*a*) Bacterial Canker of Tomato (*Corynebacterium michiganense* pv. *michiganense* (E. F. Smith) Jensen); and

SCHEDULE 2

PART IIIB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		(*b*) Tomato Bacterial Spot (*Xanthomonas campestris* pv. *vesicatoria* (Doidge) Dye). (2) The consignment shall be accompanied by either: (*a*) an official statement that the seeds comprising it were taken from plants which were grown in a country in which Tomato Bunchy Top viroid (syn. Potato Spindle Tuber viroid) is not known to occur; or (*b*) an official statement that the seeds comprising it were taken from plants which were grown at a place of production at which no symptoms of Tomato Bunchy Top viroid (syn. Potato Spindle Tuber viroid) have been observed in any plants during at least one official inspection carried out since the beginning of the last complete cycle of vegetation; and (*c*) an official statement that the seeds comprising it were extracted by an acid extraction method. (3) Where the consignment has been consigned to Northern Ireland from a third country, in addition to complying with the requirements of paragraphs (1) and (2), it shall be accompanied by: (*a*) an official statement that the seeds comprising it were taken from plants which were grown either: (i) in a region in which Bacterial Canker of Tomato (*Corynebacterium michiganense* pv. *michiganense* (E. F. Smith) Jensen) is not known to occur; or (ii) at a place of production at which no symptoms of Bacterial Canker of Tomato (*Corynebacterium michiganense* pv. *michiganense* (E. F. Smith) Jensen) have been observed during at least one official

SCHEDULE 2

PART IIIB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		(iii) grown at a place of production at which and in the immediate vicinity of which no symptoms of Bacterial Wilt of Lucerne (*Corynebacterium michiganense* pv. *insidiosum* (McCull.) Dye and Kemp) have been observed during an inspection made during the last complete cycle of vegetation or, where the crop was in its second complete cycle of vegetation, the last two complete cycles of vegetation; and (iv) grown on land on which no lucerne has been grown during the three years immediately prior to the crop having been sown. (4) Where the consignment has been consigned to Northern Ireland from a third country, in addition to complying with the requirements set out in paragraphs (1), (2) and (3), the seeds comprising it: (*a*) shall not have been taken from a crop which was grown in Brazil, Chile, Mexico, the Union of Soviet Socialist Republics or in any other country (other than a Member State, Australia, Austria, Canada, Czechoslovakia, Finland, the German Democratic Republic, Israel, New Zealand, Poland, Romania, the Republic of South Africa, Spain, Sweden or the United States of America) in which Bacterial Wilt of Lucerne (*Corynebacterium michiganese* pv. *insidiosum* (McCull.) Dye and Kemp) is known to occur; and (*b*) shall have been taken from a crop which was grown at a place of production at which no symptoms of Verticillium Wilt of Lucerne (*Verticillium albo-atrum* Reinke and Berth.) have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation.

SCHEDULE 2

PART IIIB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
60.	Seeds of pea (*Pisum sativum* L.) for sowing.	(1) The consignment shall be free from Bacterial Blight of Pea (*Pseudomonas syringae* pv. *pisi* (Sackett) Young *et al.*). (2) The consignment shall be accompanied by either: (*a*) an official statement that the seeds comprising it were taken from a crop which was grown in a region of production in which Bacterial Blight of Pea (*Pseudomonas syringae* pv. *pisi* (Sackett) Young *et al.*) has not been known to occur during the period of ten years prior to the date on which the phytosanitary certificate accompanying the consignment was issued; or (*b*) an official statement that the seeds comprising it were grown at a place of production at which no symptoms of Bacterial Blight of Pea (*Pseudomonas syringae* pv. *pisi* (Sackett) Young *et al.*) have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation.
61.	Seeds from plants of the genus *Rubus* L. for sowing.	(1) The consignment shall be free from: (*a*) Black Raspberry Latent virus; (*b*) Cherry Leaf Roll virus; (*c*) Prunus Necrotic Ring Spot virus; and (*d*) Tomato Ring Spot virus. (2) The consignment shall be accompanied by either: (*a*) an official statement that the seeds comprising it were taken from plants which were grown in a country in which Black Raspberry Latent virus, Cherry Leaf Roll virus, Prunus Necrotic Ring Spot virus and Tomato Ring Spot virus are not known to occur in plants of the genus *Rubus* L.; or (*b*) an official statement: (i) that the seeds comprising it

PART IVA

RAW FRUIT

General Conditions

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
65.	All raw fruit	(1) The consignment shall be free from the pests set out in Schedule 1 other than San José Scale (*Comstockaspis perniciosa* (Comstock) syn. *Quadraspidiotus perniciosus* (Comstock)). (2) The consignment shall be substantially free from young and active stages of San José Scale (*Comstockaspis perniciosa* (Comstock) syn. *Quadraspidiotus perniciosus* (Comstock)) during the period 16th September to 30th April (both dates inclusive) in each year and free from that pest during the period 1st May to 15th September (both dates inclusive) in each year.

PART IVB

RAW FRUIT

Additional conditions in the case of raw fruit of the genera *Citrus, Cydonia, Malus, Prunus* and *Pyrus*.

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
66.	Raw fruit from plants of the genera: *Cydonia* Mill. *Malus* Mill. *Prunus* L. *Pyrus* L. *Citrus* L. other than lemons (*Citrus limon* (L.) Burm.) and citron (*Citrus medica* L.).	The consignment shall be accompanied by a phytosanitary certificate and as appropriate, one or more re-forwarding phytosanitary certificates in accordance with Article 7 or 8 and Article 10.
67.	Raw fruit from plants of the genera: *Cydonia* Mill. *Malus* Mill. *Prunus* L. *Pyrus* L.	(1) The consignment shall be free from Peach Twig Borer (*Anarsia lineatella* Zeller). (2) Where the consignment has been consigned to Northern Ireland from a third country and the fruit comprising it was grown in North America, Egypt or Japan, in addition to complying with the requirements of paragraphs (1) and (4), the consignment shall be accompanied by an official statement that the fruit has been officially examined and found to be free from Fruit Brown Rot (*Monilinia fructicola* (Wint.) Honey). (3) Where the consignment has been consigned to a third country and the fruit comprising it was grown in Central America, South America, Australia or New Zealand, in addition to complying with the requirements of paragraphs (1) and (4), the consignment shall be accompanied by either: (*a*) an official statement that the fruit originates in an area known to be free from Fruit Brown Rot (*Monilinia fructicola* (Wint.) Honey); or (*b*) an official statement that no symptoms of Fruit Brown Rot (*Monilinia fructicola* (Wint.) Honey) have been observed on plants at the place of production or on the fruit during at least one official inspection carried out since the beginning of the last complete cycle of vegetation. (4) Where the consignment has been consigned to Northern Ireland from a third country, the fruit comprising it in addition to complying with the

SCHEDULE 2

PART IIIB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		inspection carried out since the beginning of the last complete cycle of vegetation; and (*b*) an official statement that the seeds comprising it were taken from plants which were grown either: (i) in a country in which Tomato Bacterial Spot (*Xanthomonas campestris* pv. *vesicatoria* (Doidge) Dye) is not known to occur; or (ii) at a place of production at which no symptoms of Tomato Bacterial Spot (*Xanthomonas campestris* pv. *vesicatoria* (Doidge) Dye) have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation; and

PART IIIC

SEEDS

Additional conditions in the case of seeds of the families Cruciferae and Gramineae and of the genus *Trifolium*

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
63.	Seeds from plants of the families Cruciferae and Gramineae and of the genus *Trifolium* for sowing	Where the consignment has been consigned to Northern Ireland from a third country and the seeds comprising it were grown in Argentina, Australia or New Zealand, it shall: (*a*) be accompanied by a phytosanitary certificate and, as appropriate, one or more re-forwarding phytosanitary certificates in accordance with Articles 8 and 10; and (*b*) be free from the Stem Weevil (*Hyperodes bonariensis* Kuschel).

PART IIID

SEEDS

Additional conditions in the case of seeds of Onion, Leek and Chive.

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
64.	Seeds of: onion (*Allium cepa* L.) leek (*Allium ampeloprasum* var. *porrum* (L.) Gay) chive (*Allium schoenoprasum* L.) for sowing	The consignment shall be free from Stem Nematode (*Ditylenchus dipsaci* (Kühn) Filipjev).

PART VA

RAW VEGETABLES

General Conditions

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
76.	All raw vegetables	The consignment shall be free from the pests set out in Schedule 1.

PART VB

RAW VEGETABLES

Additional conditions in particular cases

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
77.	Raw vegetables from plants of the genera *Beta* L., *Brassica* L., *Cichorium* L.. *Daucus* L. and *Lactuca* L. with foliage	(1) The consignment shall be accompanied by a phytosanitary certificate and, as appropriate, one or more re-forwarding phytosanitary certificates in accordance with the provisions of Article 7 or 8 and Article 10. (2) During the period 1st April to 14th October (both dates inclusive) in each year the consignment shall be accompanied by either: (*a*) an official statement that the vegetables comprising it were grown under permanent structures of glass or plastic; or (*b*) an official statement that the vegetables comprising it were grown in an area within which during the last complete cycle of vegetation there has been no occurrence of Colorado Beetle (*Leptinotarsa decemlineata* (Say)) within 25 km of the place of production; or (*c*) an official statement that the vegetables comprising it were grown in an area in which all potato crops are treated with an insecticide specifically to control Colorado Beetle (*Leptinotarsa decemlineata* (Say)) and that any potato or tomato crop grown on the same land as the vegetables during the 12 months prior to the date on which the phytosanitary certificate accompanying the consignment was issued were treated under official supervision to prevent the contamination of the soil with Colorado Beetle (*Leptinotarsa decemlineata* (Say)). (3) The consignment shall have been cleaned under official supervision in such a way as to remove all Colorado Beetles (*Leptinotarsa decemlineata* (Say)) and un-needed foliage and to minimise contamination with soil and debris. (4) Where the vegetables comprising the consignment are not

SCHEDULE 2

PART IVB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		requirements of paragraph (1) and paragraph (2) or (3), it shall be free from: (*a*) Oriental Peach Moth (*Carposina niponensis* Walsingham syn. *Carposina sasakii* Matsumura); (*b*) Asian Fruit Moth (*Grapholita inopinata* Heinrich syn. *Cydia inopinata* (Heinrich)); (*c*) Lesser Apple Worm (*Enarmonia prunivora* (Walsh)); (*d*) Cherry Fruit Worm (*Enarmonia packardi* Zeller); (*e*) Apple Curculio (*Tachypterellus quadrigibbus* (Say.)); (*f*) Western Cherry Fruit Fly (*Rhagoletis indifferens* Curran); (*g*) Queensland Fruit Fly (*Dacus tryoni* Froggatt); (*h*) Japanese Cherry Fruit Fly (*Rhacochlaena japonica* Ito); and (*i*) Asian Pear Bud Borer (*Nephopteryx pirivorella* (Matsumura)).
68.	Raw fruit of cherry: *Prunus avium* L., *Prunus cerasus* L., and hybrids and cultivars thereof.	The consignment shall be free from the European Cherry Fruit Fly (*Rhagoletis cerasi* (L.)).
69.	Raw fruit of apple (*Malus pumila* Mill. and cultivars thereof).	Where the consignment has been consigned to Northern Ireland from a third country, it shall be free from: (*a*) Apple Fruit Canker (*Guignardia piricola* (Nose) Yamamoto); and (*b*) Alternaria Blotch (*Alternaria mali* Roberts).
70.	Raw fruit of pear (*Pyrus communis* L. and cultivars thereof).	Where the consignment has been consigned to Northern Ireland from a third country, it shall be free from: (*a*) Pear Black Spot (*Alternaria kikuchiana* Tanaka); and (*b*) Pear Scab (*Venturia nashicola* Tanaka and Yamamoto).

PART IVC

RAW FRUIT

Additional conditions in the case of raw fruit of the genera *Fragaria, Ribes, Rubus, Vaccinium* and *Vitis*

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
71.	Raw fruit from plants of the genera: *Fragaria* L. *Ribes* L. *Rubus* L. *Vaccinium* L. *Vitis* L.	Where the consignment has been consigned to Northern Ireland from a third country, it shall be accompanied by a phytosanitary certificate and, as appropriate, one or more re-forwarding phytosanitary certificates in accordance with Articles 8 and 10.
72.	Raw fruit of strawberry (species, hybrids and cultivars of *Fragaria* L.)	Where the consignment has been consigned to Northern Ireland from a third country, it shall be free from plant debris, leaves and leaf pieces.
73.	Raw fruit of grape vine (species, hybrids and cultivars of *Vitis* L.)	Where the consignment has been consigned to Northern Ireland from a third country, it shall be free from: (*a*) Vine Black Rot (*Guignardia bidwellii* (Ellis) Viala and Ravaz); and (*b*) plant debris, leaves and leaf pieces.
74.	Raw fruit from plants of the genera: *Ribes* L. *Rubus* L.	Where the consignment has been consigned to Northern Ireland from a third country, it shall be free from: (*a*) North American Currant Fruit Flies (*Epochra canadensis* (Loew) and *Rhagoletis ribicola* Doane); and (*b*) plant debris, leaves and leaf pieces.
75.	Raw fruit from plants of the genus *Vaccinium* L.	Where the consignment has been consigned to Northern Ireland from a third country, it shall be free from: (*a*) Blueberry Maggot (*Rhagoletis mendax* Curran); and (*b*) plant debris, leaves and leaf pieces.

PART VIB

CUT FLOWERS AND PARTS OF PLANTS USED FOR DECORATION

Additional conditions in the case of cut flowers and parts of plants used for decoration of the genera *Castanea, Dendranthema, Dianthus, Gladiolus, Prunus, Quercus, Rosa, Salix, Syringa* and *Vitis*

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
80.	Cut flowers and parts of plants used for decoration of the genera: *Castanea* Mill. *Dendranthema* (DC.) Desmoul. (florists' chrysanthemum) *Dianthus* L. *Gladiolus* L. *Prunus* L. *Quercus* L. *Rosa* L. *Salix* L. *Syringa* L. *Vitis* L.	The consignment shall be accompanied by a phytosanitary certificate and, as appropriate, one or more re-forwarding phytosanitary certificates in accordance with the provisions of Article 7 or 8 and Article 10.
81.	Cut flowers of florists' chrysanthemum (species, hybrids and cultivars of *Dendranthema* (DC.) Desmoul.)	(1) The consignment shall be free from: (*a*) Chrysanthemum White Rust (*Puccinia horiana* P. Henn.); (*b*) Chrysanthemum Midge (*Rhopalomyia chrysanthemi* (Ahlberg) syn. *Diarthronomyia chrysanthemi* (Ahlberg)); and (*c*) Chrysanthemum Ray Blight (*Didymella chrysanthemi* (Tassi) Garibaldi and Gullino). (2) Where the consignment has been consigned to Northern Ireland from a third country, in addition to complying with the requirements of paragraph (1), it shall be accompanied by either: (*a*) an official statement that the crop from which the flowers were taken was grown in a country in which Chrysanthemum White Rust (*Puccinia horiana* P. Henn.) is not known to occur; or (*b*) an official statement that the crop from which the flowers were taken was officially inspected and found to be free from Chrysanthemum White Rust (*Puccinia horiana* P. Henn.).
82.	Cut flowers of gladiolus (*Gladiolus* L.)	(1) The consignment shall be free from Gladiolus Rusts (*Uromyces* spp.). (2) Where the consignment has been consigned to Northern Ireland from a country of the European Community,

SCHEDULE 2

PART VIB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		in addition to complying with the requirements of paragraph (1) of this item, it shall be accompanied by either: (*a*) an official statement that the plants comprising it were grown in a country which is known to be free from Gladiolus Rusts (*Uromyces* spp.); or (*b*) an official statement that the plants comprising it were grown at a place of production at which no symptoms of Gladiolus Rusts (*Uromyces* spp.) have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation. (3) Where the consignment has been consigned to Northern Ireland from a third country in addition to complying with the requirements of paragraph (1), it shall be either: (*a*) accompanied by an official statement that the plants comprising it were grown in a country which is known to be free from Gladiolus Rusts (*Uromyces* spp.); or (*b*) landed in Northern Ireland during the period 1st November to 31st May (both dates inclusive) in each year and be accompanied by an official statement that the plants comprising it were grown at a place of production at which no symptoms of Gladiolus Rusts (*Uromyces* spp.) have been observed during at least one official inspection carried out since the beginning of the last complete cycle of vegetation.

SCHEDULE 2

PART VB

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
		packed in new packages the containers in which they are packed shall: (*a*) be constructed in such manner and of such materials that they are capable of being effectively cleaned; and (*b*) have been cleaned in accordance with an officially approved method. (5) The consignment shall have been transported from the packing station to the consignee's premises in containers which have been closed in such a manner as to prevent the entry of pests.
78.	Raw vegetables not intended for planting except asparagus (*Asparagus officinalis* L.); aubergine (*Solanum melongena* L.); beans (*Vicia faba* L. and *Phaseolus* L.) other than in pod; capsicum, chilli, paprika, peppers and pimento (*Capsicum* L.); globe artichoke (*Cynara scolymus* L.); mushroom (*Agaricus bisporus* (J. Lange) Imbach) and other edible fungi; peas (*Pisum sativum* L.) other than in pod; and raw vegetables of the family Cucurbitaceae	Where the consignment has been consigned to Northern Ireland from a third country and the vegetables comprising it were grown in a European country (other than a Member State), the Republic of South Africa, the Americas, Australia, New Zealand, the Union of Soviet Socialist Republics, the People's Republic of China, Japan, Korea (North), South Korea, Taiwan, Hong Kong or Macao the vegetables comprising it shall: (*a*) have been washed to remove any soil from roots; and (*b*) be free from beetle pests (Coleoptera).

PART VIA

CUT FLOWERS AND PARTS OF PLANTS USED FOR DECORATION

General Conditions

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
79.	All cut flowers and parts of plants used for decoration	(1) The consignment shall be free from the pests set out in Schedule 1 other than Carnation Tortricids (*Cacoecimorpha pronubana* (Hübner) and *Epichoristodes acerbella* (Walker)). (2) The consignment shall be substantially free from Carnation Tortricids (*Cacoecimorpha pronubana* (Hübner) and *Epichoristodes acerbella* (Walker)) during the period 16th October to 30th April (both dates inclusive) in each year and free from those pests during the period 1st May to 15th October (both dates inclusive) in each year.

PART VIC

CUT FLOWERS AND PARTS OF PLANTS USED FOR DECORATION

Additional conditions in the case of cut flowers of the genus *Protea* L.

Item	*Description of plants and plant products*	*Conditions subject to which landing is permitted*
83.	Cut flowers of the genus *Protea* L.	Where the consignment has been consigned to Northern Ireland from a third country and the plants comprising it were grown in the Republic of South Africa it shall be accompanied by a phytosanitary certificate and, as appropriate, one or more re-forwarding phytosanitary certificates in accordance with the provisions of Article 7 or 8 and Article 10.

SCHEDULE 3 Article 9

PLANTS AND PLANT PRODUCTS TO BE ACCOMPANIED BY A PHYTOSANITARY CERTIFICATE OR A RE-FORWARDING PHYTOSANITARY CERTIFICATE WHEN EXPORTED

Item	*Description of plants, plant products and soil*
1.	Plants planted or intended for planting other than seeds and aquarium plants.
2.	*Seeds of lucerne (Medicago sativa* L.), peas (*Pisum sativum* L.) and tomato (*Lycopersicon esculentum* Mill. and hybrids and cultivars thereof) and of the genus *Rubus* L.
3.	Cut flowers and other parts of plants intended to be used for decoration derived from plants of the genera: *Castanea* Mill. *Dendranthema* (DC.) Desmoul. (florists' chrysanthemum) *Dianthus* L. *Gladiolus* L. *Prunus* L. *Quercus* L. *Rosa* L. *Salix* L. *Syringa* L. *Vitis* L.
4.	Raw fruit from plants of the genera: *Citrus* L., other than lemons (*Citrus limon* (L.) Burm.) and citron (*Citrus medica* L.) *Cydonia* Mill. *Malus* Mill. *Prunus* L. *Pyrus* L.
5.	Soil which contains parts of plants or humus, other than peat.

EXPLANATORY NOTE

(This note is not part of the Order.)

This Order, which is made under the Plant Health Act (Northern Ireland) 1967 as amended, replaces the Importation of Plants, Plant Produce and Trees Order (Northern Ireland) 1972. The Order implements those provisions of Council Directive 77/93/EEC (O.J. No. L.26, 31.1.77 p. 20) as amended by Directives 80/392/EEC and 80/393/EEC (O.J. No. L.100, 17.4.80 p. 32) which prohibit the importation into Member States of the European Community of certain pests harmful to plants and which set out controls on the movement of plants and plant products across the frontiers of the European Community.

The Order also sets out controls:

(*a*) in respect of direct trade with third countries; and

(*b*) on the movement of genetically manipulated material and pests harmful to agricultural, horticultural or silvicultural crops.

The provisions of Council Directive 77/93/EEC which control the movement of potatoes are implemented by the Import and Export (Potatoes) (Plant Health) Order (Northern Ireland) 1981 and the provisions which control the movement of wood, timber and isolated bark of certain forest trees are implemented by the Import and Export (Wood and Bark) (Plant Health) Order (Northern Ireland) 1981.

The Order:

(*a*) prohibits the landing in Northern Ireland of certain plants and plant products and certain pests (Article 5 and Schedule 1);

(*b*) sets out the circumstances in which plants and plant products are permitted to be landed in Northern Ireland (Article 6 and Schedule 2);

(*c*) sets out the circumstances in which plants and plant products are to be accompanied, when landed, by phytosanitary certificates and re-forwarding phytosanitary certificates, the form of such certificates and the manner in which they are to be completed (Articles 7, 8 and 10 and Schedules 4 and 5);

(*d*) requires that when exported certain plants and plant products are to be accompanied by a phytosanitary certificate or a re-forwarding phytosanitary certificate (Article 9 and Schedule 3);

(*e*) exempts from certain of its provisions plants and plant products grown in Northern Ireland and plants and plant products landed in passengers' baggage (Article 4);

(*f*) provides powers of entry, examination, sampling and marking (Article 11) and powers to enable remedial action to be taken when plants, plant products, pests, genetically manipulated material or soil are landed or are likely to be landed in contravention of the Order (Articles 12 and 13);

(*g*) provides that officers of Customs and Excise may detain plants and plant products for examination by an inspector (Article 15);

(*h*) provides that the landing in Northern Ireland of any plant, plant product, pest, genetically manipulated material or soil prohibited by the Order may be authorised by licence (Article 16);

(*i*) requires that persons having in their possession information regarding any plant, plant product, pest, genetically manipulated material or soil landed in or exported from Northern Ireland may be required to disclose that information (Article 17);

(*j*) provides for offences in connection with this Order and sets out the penalties which may be imposed in respect of a contravention of or failure to comply with the Order (Article 18).
